outdoor lighting

ES Nuestra aventura empresarial comienza en 1980. Por aquel entonces, el concepto de diseño era aún vagamente interpretado en nuestro entorno, Euskadi. Esta circunstancia, junto a un escasísimo mercado local para este tipo de producto, nos llevó ya por aquel entonces a la internacionalización.

Salimos al mercado internacional con unos inmejorables compañeros de viaje: los diseñadores de nuestros productos. En 1980-1981 trabajamos con Guillermo Capdevilla, uno de los promotores del diseño en Euskadi. Él fue el creador de Blux System, una colección de luminarias que dio un giro en la estrategia de producto de B.lux.

La nostalgia y las tendencias del mercado nos llevan hoy, 39 años después, a reeditar esta familia de luminarias de formas sencillas, que siguen las directrices de la escuela inglesa de diseño. Regresamos, con orgullo, a nuestros orígenes.

La ubicación de nuestras instalaciones en un enclave natural privilegiado también deja huella en las luminarias que fabricamos. Luminarias como Keshi emplean materiales muy cotizados a nivel internacional, como el mármol negro de las canteras de Markina, ubicadas en las inmediaciones de nuestra fábrica, de 5.000 m².

Es precisamente esa condición de fabricantes, tan poco habitual hoy en día, la que nos permite imprimir un carácter especial a nuestros productos, a los que aplicamos los máximos procesos de fabricación en nuestras instalaciones.

También nuestra proximidad a Bilbao, convertida hoy en referente internacional de arquitectura y diseño, ha moldeado nuestro catálogo de iluminación, gracias a nuestra participación en proyectos de iluminación de referencia en la Ciudad del Diseño, según la UNESCO.

Es así como todas y cada una de las luminarias que componen nuestro catálogo tienen una historia y un por qué. Una historia que refuerza nuestra identidad, forjada a lo largo de 39 años de historia.

EN Our business adventure began in 1980. At that time the concept of design was only vaguely appreciated in our area: the Basque Country. This, together with a very scarce local market for this type of product, spurred us towards internationalisation at a very early stage.

We hit the international market with a set of indispensable collaborators: our product designers. In 1980-1981 we worked with Guillermo Capdevilla, one of the promoters of design in Euskadi. He was the creator of the Blux System, a collection of lamps that marked a shift in B.lux's product strategy.

Nostalgia and market trends prompt us today, 39 years later, to rerelease this family of lamps, defined by their simple shapes and conforming to the patterns of the English school of Design. Proudly returning to our origins. The location of our facilities, in a very special natural enclave, also makes its mark on the lamps we produce. Lamps like the Keshi employ materials that are internationally coveted, like black marble from the Markina quarry, located close to our 5,000 m² factory.

It is precisely our role as manufacturers, very unusual today, which allows us to endow our products with a special quality, as we employ the finest maxim manufacturing processes at our facilities.

Our proximity to Bilbao, which has become an international landmark city in the fields of Architecture and Design, has also shaped our lighting catalogue, thanks to our participation in high-profile lighting projects in the City of Design, according to UNESCO.

Thus, each and every one of the lamps making up our catalogue has a story and a reason for being. These stories reinforce our identity, forged over 39 years of history.
