Indoor

Rigid Light

44	Vivoxo Graze	Wall grazing light with small section size	1900 - 3500 lm/m
52	RECTA	Square shape of three surface emission with high brightness, dotfree	2150 lm/m
58	THOF®	Dynamic white type of square rigid light, dotfree	2370 lm/m max
64	Creide® lens / F	Low height crescent shape light with narrow/wide-angle, ideal for cove light	1190 lm/m
74	silux® K	RENEWAL Squared shape small section light for shelf, dotfree	190 - 550 lm/m
82	silux® wide K	RENEWAL Quarter circular shape light for wider light distribution for shelf, dotfree	250 - 730 lm/m
96	Slim Light	Circular shape light with tilting parts for shelf and indirect light, dotfree	600 lm/m
102	nano line	Only 5mm light emission surface for recessed linear light, dotfree	60 lm/m

Strip Light

112	Power FLEX EX	RENEWAL High efficacy type, various LED pitch and wattage	370-1500 lm/m
120	Power FLEX Spect C	NEW Ideal for display light which needs quality light such as luxury goods or artwork	965 lm/m
122	Power FLEX	Ideal for shelf light with small cuttable unit	560 or 710 lm/m
128	Power FLEX THOF®	Dynamic white tape light, choice of 1900K 3000K/ 2700K-5300K	660 lm/m max
132	Flat FLEX F	Low brightness top bend strip light, ideal for furniture light	170 or 280 lm/m
138	Power FLEX α	Side bend type for curved shape cove light	580 lm/m
142	FLEX α F	Low brightness side bend strip light, ideal for skirting light	220 lm/m

Outdoor

Rigid Light

150	EFRO IP65		Moisture-proof ideal for bathroom and semi-outdoor, dotless	610 lm/m
158	Power LEDs Line IP65	RENEWAL	Compact yet powerful Outdoor grazer	1570 lm/m
164	LEDs Bar IP65		3 surface emitted, completely dotless ideal for recessed linear light on the wall	780 lm/m
170	LEDs Line Hi IP67	RENEWAL	UV protected facade Semi-deffused ideal for outline of the building	780 lm/m

Strip Light

176	UQ FLEX IP67	RENEWAL	Dotless flexible linear light, 2M/5M length customizable, good for facade lighting	1000 lm/m
186	Power FLEX EX IP65	RENEWAL	High efficacy type, various LED pitch and wattage	370-1500 lm/m
190	Power FLEX F IP65		Small cattachable unit with maximum 5m custom length	560 or 710 lm/m
194	Flat FLEX F IP65		Low brightness top bend strip light, ideal for night light in hotel bathroom, ideal for cove light	170 or 280 lm/m
198	FLEX α F IP65	NEW	Low brightness side bend strip light, ideal for handrail and landscape.	250 lm/m
202	FLEX α KINU IP65		Low brightness side bend strip light, ideal for handrail and landscape, dotless.	220 lm/m

What's Luci / Strength Luci

History of Luci

Established as a lighting division of PROTERAS Co. Ltd., in 2004. Luci has since gained international awe for its impeccable range of lighting products from Japan.

Considerably a young brand in the market. Luci is proud to be recognized as the brand of choice by the majority. With that, Luci is very pleased to have a number of impressive project references to share with the world. All this is possible as a result of undeniable fighting spirit by the pioneers of the company from the beginning of Luci. Along with the strong & active support of the industry. Luci will continue to strive for perfection in every project to come.

- 2004 - Established Luci brand in Contents Co., Ltd. in Tokyo
- 2009 - Luci (Shanghai) Lighting Technology established
- 2010 - Company name was changed to PROTERAS Co., Ltd.
- 2011 - Beijing office established
- 2012 - Luci Pte. Ltd. in Singapore and Hong Kong established
- 2015 - Luci Co., Ltd. established

Strength Luci

Design Policy

Our in-house research and development team design our products from concept to appearance and choosing materials. We pursue high usability through simple and minimum designs that provide both an attractive price and good function. More than 15 cases of the uniquely designed products by Luci have been patented in Japan, demonstrating that they have been able to bring customers' needs to market quickly.

Quality control

We conduct strict reliability tests at internal and third parties based on JIS standards and CE mark standards.

Product range

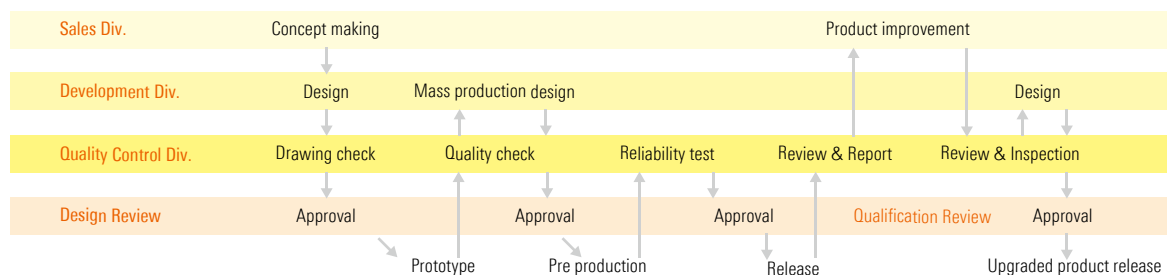

Since the release of FLEX series in Japan in 2004, we have developed and sold products such as homogenous rigid light and wall graze light etc. in response to the architectural and interior market needs. Today, we are developing not only architectural lighting but also functional lighting such as LED insect traps, inspection lighting with CRI97 for printing and manufacture industry, and our original switching power supplies.

Warranty period

Luci standard warranty period is 2 or 3 years from shipping date. If the LED fixture has trouble during this period, we will repair or replace it free of charge. In case of the requirement of the warranty period, we will provide up to 5 years warranty after consulting the installation environment and usage hours per day. Please refer to the appendix in this catalogue for further detail.

Product development and improvement process

We develop new products and improve the existing products in a collaboration between sales, development, and quality control team. Design review is carried out speedily at the appropriate time, and new products launch with the results of reliability tests. Also, to maintain the quality of products at the factory, we regularly review and have an inspection after release, and update the products and materials depending on technical improvement.

Luci brand global network

Our offices are located in Tokyo, Osaka, Singapore, Hong Kong, Shanghai, Beijing and South Korea. We've supplied our products to more than 30 countries including Europe and the Middle East by working with local distributors.

Even if the designer and the location of the project are in different countries, we use the Luci brand network to closely communicate information and support the success of your project.

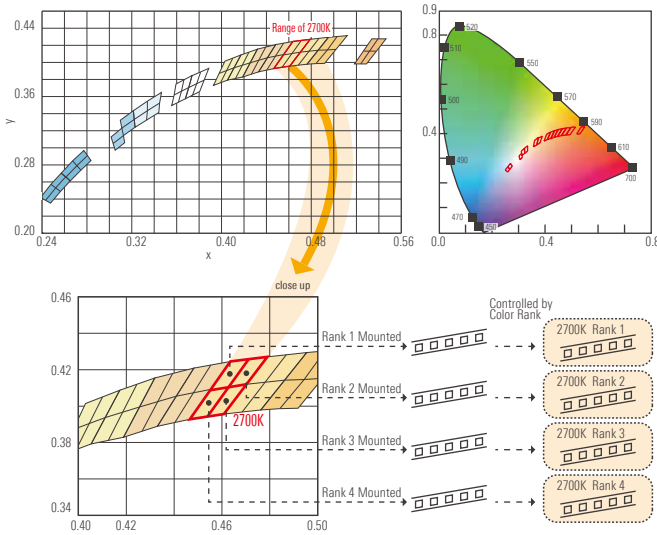

Color Management

▶ ANSI Bin

The LED package that we select by color coordinates are procured for each rank and these are not mixed with other ranks when being mounted on circuit boards. Inventory and shipment is managed each LED rank. In addition, a visual color inspection of all unit is conducting before shipping.

Please note that the color temperature of some of products sold by Luci are outside the industry standard to meet the needs of customers. Luci original rules has been set for these.

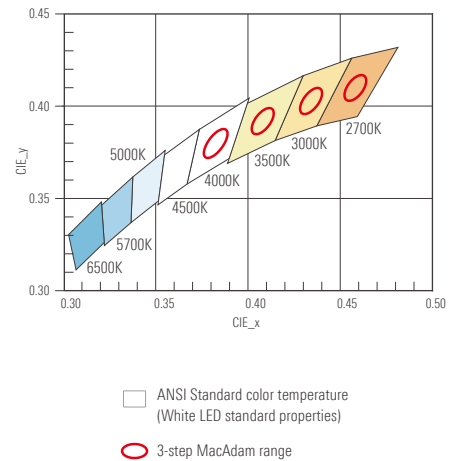

▶ MacAdam 3 step

Part of Luci's new products and improved products have adopted the MacAdam 3 steps LED package which is said the color is more uniform and consistend.

"MacAdam ellipses" is a standard derived from visual color matching experiments and shows the standard deviation of the color discrimination variations from a specific centre color on the xy chromaticity diagram.

The standard deviation shown with the "MacAdam ellipses" does not indicate a color difference distinguishable by the average human eye, but in another experiment MacAdam found that the color discrimination threshold is about three times (3-Step) the standard deviation.

Variety of Color temperature

Nominal color temperature variation

		D	N	W	WW	L30	L27	L24	L21	L19

Design support

We regularly release the project reference and application book that included the tips of installation to get the best performance of the lightings. For calculation, ies file of all products could be downloaded on our website.

In the case of customised requirement, our sales team and design team support designer.

Planning and customer support

This catalog covers all of the installation cross-section sizes, required mounting parts and also notes on installation. We would provide a free demo sample on your request as we believe the quality of light can not be compared only by seeing the specifications.

Our inbound sales team can respond to emails at an alarming rate. Any inquiries are welcomed at info@luci.co.jp

Caution:

Do not cut the LED fixture and the lead wire of outdoor product at a job site.
Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

Prohibited installation places:

- water directly fall on or pooled
- the sunlight directly shines on
- liquids including choline or chemicals fall on
- high temperature and high humidity such as saunas
- coastal areas which are affected by sea spray

Application

A Direct view for facade, indirect light for high rise building

Directly expose light with the straight or curved installation. The random layout can make a futuristic design and install along the shape of the building can emphasise the shape of the building. It is necessary to consider the weather resistance and UV resistance of the LED fixture. IP67 products are suggested to use.

- Luci UQ FLEX IP67** 15.8W 980lm | 12W 770lm | 8W 530lm P.176
 Fully dot free, minimum bending radius of 300 mm. Highly customizable which is up to 2m. Original silicone material with high weather resistance is used, and it is less deteriorated by UV.

C Grazing light for facade (upward / downward)

Illuminate the outdoor wall surface upwards or downwards to make eye-catching facade. To get gradually stretch of the light, using fixture with narrow beam angle is recommended. It is necessary to consider to make water drains to avoid LED fixtures submerged.

- Luci UQ FLEX IP67 (for upward)** 15.8W 980lm | 12W 770lm | 8W 530lm P.176
 Fully dot free, minimum bending radius of 300 mm. Highly customizable which is up to 2m. Original silicone material with high weather resistance is used, and it is less deteriorated by UV. Choice of 2 type cable feed make it possible to correspond to various site installation environment.

- Power LEDs line IP65 (for downward)** 19.2W 1570lm P.158
 Since it has compact cross-section, it is ideal for the facade wall of a roadside shop where installation space is small. Because of the extrusion lens, unexpected scalloped pattern hardly comes out even if the distance from the wall is short.

B Under canopy, indirect light for low rise building

Appropriate brightness as well as warm glow without dot to welcome customers. For indirect lighting of glass surfaces and shiny wall materials, dot-free LED fixtures are recommended. IP65 lighting fixture can be used on areas where there are no pooling of water and no direct sunlight.

- Luci EFRO IP65** 8.4W 610 lm P.150
 Ideal for large installation space. Can bring the indirect lighting of soft and smooth effect by the circular cross-section lighting.

- Power LEDs line IP65 (for downward)** 19.2W 1570lm P.158
 Ideal for small installation space. Light spreads beautifully with three sided light emission.

D Light box

Surface Light from diffused glass or stretching sheet needs to have appropriate distance of the depth and place lighting at an equal pitch, which creates less unevenness flat light.

- Luci Power FLEX EX series IP65** P.186
18.2W 1450lm | 12.1W 1020lm | 9.5W 700lm | 6.5W 520lm | 4.5W 370lm
 High efficient, MacAdam 3steps, suitable for lightsource of surface lighting. Various brightness, power consumption and LED pitching provide wide selection depending on installation area. For making uniform light surface, at least 100mm depth is required.

- Luci Flat FLEX series IP65** 3.9W 280lm | 2.5W 180lm P.194
 When making the line of a recessed light, the minimum depth may be required. Flat FLEX has 10mm pitch and 16mm pitch of LED package gap so that can make the box at least 30mm depth.

E Handrail, steps and stairs

Place the light inside a handrail to shine walkway and baluster. Side bend flexible light is suitable for a curved area. For stair, various length of light fixture and mounting parts which can hold the lighting fixture not to drop off will be required.

■ Luci FLEX KINU α IP65 4.8W 220lm P.202
Semi diffused tube is suitable for reflected floor material and where people can see directly. Due to special circuit design, long wiring maximum 75m is possible in case there is no place to install a LED driver close with LED fixtures.

■ Luci FLEX α IP65 3.9W 250lm P.198
Only 14 x 18.5mm dimension size including mounting rail and clip is ideal for under the edge of steps. Custom length is available every 62.4mm up to 5m.

F Under bench

Enhance the texture of the reflected tile and stones for night landscape.

■ Luci EFRO IP65 8.4W 610 lm P.150
700lm/m which is appropriate brightness for landscape. High CRI is good for real color of tile and stone material.

■ Luci Flat FLEX series IP65 3.9W 280lm | 2.5W 180lm P.194
2.5W/m or 3.9W/m could be chosen which is ideal for landscape lighting where is not necessary high brightness.

G Bathroom cove, cornice, grazing light

Steam-proof is required for everyday bathroom use. The cove and grazing lighting are suitable for bathroom enhancing relaxing effect. Downward installation with a narrow beam angle highlights the texture of wall-surface and get the feeling of brightness without downlight.

■ Luci EFRO IP65 8.4W 610 lm P.150
Steam proof by both-end gasket and integrated fuse guarantee safety. Bright enough for bathroom indirect lighting.

■ Power LEDs line IP65 15.4W 1570lm P.158
Powerful 1500lm light and choice of extrusion lens provide ideal grazing light for bathroom.

H Mirror light, vanity light

When make-up in front of a mirror, lighting from an appropriate position is required. It is recommended to light both sides of the mirror, as the downlight alone will cast shadows on the face. It is good to light up the whole space by shining light from under the mirror or under the counter.

■ Luci EFRO IP65 8.4W 610 lm P.150
No glare with fully diffused fixture, using High CRI LED which is over 90. Refined design with aluminium rail which can conceal the cables.

■ Luci UQ FLEX IP67 15.8W 980lm | 12W 770lm | 8W 530lm P.176
For curve mirror light or indirect light on reflected surface, fully dot less and bendable UQ FLEX is recommended. The wattage can be chosen from 15W/m, 12W/m or 8W/m.

A Wall grazing, curtain box

Lighting walls evenly to make space brighter and brings out wall texture.

- Luci Vivoxy Graze Indoor** 45W 3520lm | 31W 2680lm | 21W 1980lm P.44
 Ideal for a pattern panel wall and high ceiling wall. Beam angle of 15° x 32° enhances the texture of the wall surface. By using an adjustable clip, you can adjust the angle to which the light is maximized spreading.

- Luci Creide lens** 20.6W 1180lm P.64
 There is an extrusion lens in the diffuser cover, it will not be glaring even if you see it directly. Since the thickness of the fixture is 17.4mm, it is suitable for places with small installation dimensions such as curtain boxes.

B Cove / cornice light

To show the ceiling higher and get even light in the space, a linear light is being hidden into a ledge on the ceiling or wall. It is important to make a line of light continuously, choose seamless LED fixture and get enough space to hide the fixture and to do maintenance.

- Luci Creide F** 20.6W 1190lm P.64
 Dot-free, high enough lumen output with good appearance for direct lighting or cove lighting.

- Luci Power FLEX EX series** P.112
 18.2W 1450lm | 12.1W 1020lm | 9.5W 700lm | 6.5W 520lm | 4.5W 370lm
 High efficient, MacAdam 3steps, suitable for curved cove or cornice as well. Various brightness, power consumption and LED pitching provide wide selection depending on the installation area. Using 45° rail can spread light to furthermore.

C Recessed line

Recessed line light in walls expands the possibilities of space design.

- Luci nano Line** 7.2W 59lm P.102
 nano line with ultra fine line light of 5.5mm width gives a sharp impression of space. Magnet installation parts can be used for where the maintainace is difficult.

D Curved indirect light

Emphasizing the design by adding lights to curved cove lighting and the like.

- Luci Power FLEX α** 10.4W 550lm P.138
 Side bend type strip with minimum 300mm bending radius. Since light is emitted perpendicular to the direction of bending, the light can be efficiently applied to the ceiling surface of the curved cove.

- Luci Power FLEX EX series** P.112
 18.2W 1450lm | 12.1W 1020lm | 9.5W 700lm | 6.5W 520lm | 4.5W 370lm
 Top bend type strip, high efficient, MacAdam 3steps, suitable for lightsource of surface lighting. Various brightness, power consumption and LED pitching provide wide selection depending on installation area.

E Surface mount

As an ambient or task lighting, a linear light can be installed on the ceiling or the wall.

- Luci RECTA** 31.2W 2150lm P.52
 Square shape with 3 surface light-emitting makes space simple and clean. Variety of fixture length is ideal for installing a random pattern of line or matching the length with site conditions. Over 2000lm/m is bright enough for use as ceiling light instead of fluorescent light.

F Display shelf, wardrobe

Since light does not reach the inside of the shelf or wardrobe only by using the lighting from the ceiling surface, it is common to install lighting inside the furniture. In stores, select dotless linear lighting to make the product look beautiful. The lighting is preferred to be hidden under the shelf by using small dimension one.

- **Luci silux K, silux wide K** P.74, 82
 - silux K 13.3W 550lm | 8.1W 400lm | 4.3W 190lm
 - silux wide K 13.3W 730lm | 8.1W 530lm | 4.3W 250lm

High color rendering, Ra>93 for retail stores.
 silux K; squared shape, only 12 x 16mm dimension, suitable for using as recessed light at the edge of shelf board to light the light on the objects.
 silux wide K; quarter circular shape, suitable for lighting to the back of the shelf.

- **Luci Slim light** 15.4W 606lm P.96
- Circular shape light with tilting parts, suitable for wardrobe lighting to light whole inner space evenly.

G Headboard

H Mirror Lighting

Soft light wraps space from the head of the bed. Also, lighting around mirrors to make the appearance of faces brighter and more beautiful.

- **Luci silux K** 13.3W 550lm | 8.1W 400lm | 4.3W 190lm P.74
- Covered with the polycarbonate cover, square shape rigid light can be easy to install in the headboard. Variation of power consumption, 4, 8 and 13 W/m meets the requirement of brightness and limitation of power density.

- **Luci Power FLEX EX series** P.112
- 18.2W 1450lm | 12.1W 1020lm | 9.5W 700lm | 6.5W 520lm | 4.5W 370lm
- Strip light with high color rendering Ra>93, suitable for mirror light. Use as backlit or as lightsource of diffused line light on the mirror.

I Step / floor

Improve safety with increased visibility of steps and floor surfaces, and highlight stairs in space by adding light to steps and foot lights.

- **Luci Flat FLEX series** 3.9W 280lm | 2.5W 180lm P.132
- Only 14x 18.5mm dimension size including mounting rail and clip is ideal for under the edge of steps. Custom length is available every 62.4mm up to 5m.

Dynamic white series

Create an appropriate atmosphere for a scene by the color and light adjustable lighting. Suitable for office, hospital and all day restaurant. Contributes to a healthy life in a lighting space that does not break the circadian rhythm.

- **Luci THOF** 31.2W 2370lm P.58
- Square shaped rigid light, max 2370 lm/m. Ideal for surface mount, cove light where is required high brightness.

- **Luci Power FLEX THOF** 11W 660lm P.128
- Strip light with soft acrylic clear tube, max 660 lm/m. Ideal for indirect light, curved cove light.

4 Louver for Vivoxy Graze

Model No : LVV50-LV0150

150mmx2 pcs / set

1 set for each 300mm LED fixture.

A dedicated louver can be installed on Luci Vivoxy Graze. Direct glare in a parallel or vertical direction against the lighting apparatus can be prevented.

Vivoxy Graze

Installing the product

Mounting fixture installation

Adjustable fixture installation

Fall prevention mounting fixture installation

Connecting to the power supply

- Use appropriate constant current power supply according to the length of LED fixture.
- Do not split the circuit of LED fixtures into multiple from the constant current power supply.
- Connect the RED power supply cable to + (plus) and the BLACK power supply cable to - (minus) of the LED constant current (700 mA / 500 mA / 350 mA)
- When you dim, twist shield cable is recommended to use as a signal cable.

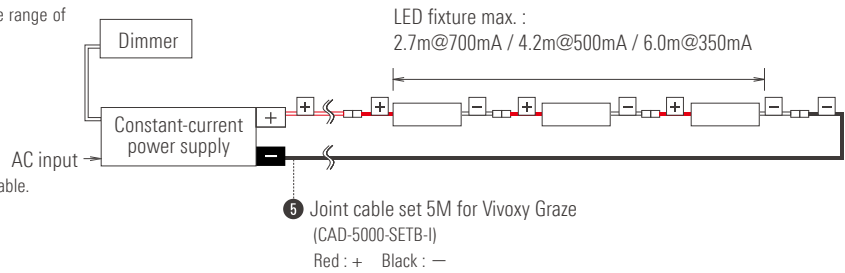

Caution: Ensure that power is off, after confirming that connections are done properly before turning on the main switch. Failure to comply with the above will result in an inrush of current, which will cause damage to the LED fixture.

If the power supply was turned on before connecting with the LED fixtures, wait one minutes or more after turning off to release the accumulated electricity inside the power supply.

System configuration diagram

- Max. connectable length depends on the wattage and output voltage range of the power supply.
- Max. length per circuit of Luci Vivoxy Graze is,
 - 2.7 m @ 700 mA
 - 4.2 m @ 500 mA
 - 6.0 m @ 350 mA
- When you dim, twist shield cable is recommended to use as a signal cable.

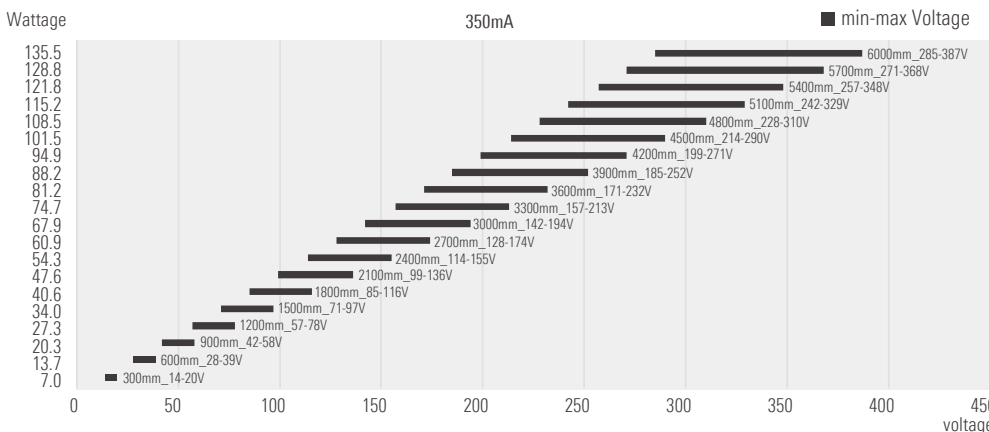

Max. connectable length per power supply

* A:ON/OFF, B:0~10V dimming type

LVV	Length of LED fixture	Power supply	Meanwell Model No.	Output voltage range
700mA	0.3~1.2m	65W	HVGC-65-700-*	9~93V
	0.6~1.8m	100W	HVGC-100-700-*	15~142V
	0.6~2.7m	150W	HVGC-150-700-*	21~215V
500mA	0.3~1.8m	65W	HVGC-65-500-*	13~130V
	0.9~4.2m	150W	HVGC-150-500-*	30~300V
	0.6~2.7m	65W	HVGC-65-350-*	18~186V
350mA	0.9~3.9m	100W	HVGC-100-350-*	29~285V
	1.2~6.0m	150W	HVGC-150-350-*	42~428V

Guide for selecting constant current driver

The minimum voltage and maximum voltage of LED fixture must be within the output voltage range of the constant current driver.
 The total wattage of LED fixture must not exceed the wattage of the power supply.
 Please contact us when you have any questions for selecting the constant current driver.
 Please follow instructions for the power supply and confirm the operation environment conditions including temperature and humidity.
 Specifications and price are subject to change without prior notification.

Option parts

1 Mounting parts A Attachment

Model No : LTH-PTA
Attached with LED fixture
2 pcs / bag

For extra order
2 pcs / bag

2 Power supply cable 3M

Model No : CAD-3000-MCRN-I
1 pc per circuit for connecting the LED fixture
to power supply or dimmer driver.

3 Joint cable 1M

Model No : CAD-1000-MCFC-I
Joint cable between two LED fixtures

Installing the product

For horizontal installation

⚠ Cautions

To avoid the mounting parts being deformed, DO NOT over-screw the screws, use countersunk screw and install the LED fixture forcefully when the mounting parts are misaligned.

When using deformed Mounting parts, the LED fixture may drop from the Mounting parts. Make sure the LED fixture is fixed tightly after installation.

For vertical installation

⚠ Cautions

- Highly recommend not to recess on the wall
- To avoid the mounting parts being deformed, DO NOT over-screw the screws, use countersunk screw and install the LED fixture forcefully when the mounting parts are misaligned.

When using deformed Mounting parts, the LED fixture may drop from the Mounting parts. Make sure the LED fixture is fixed tightly after installation.

System configuration diagram

① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)

② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.

③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

THOF®

LTH

Luci THOF® Indoor

Create a suitable effect for each scene by adjustable color temperature and brightness

Taking biorhythms into account, desired usage and atmosphere can be provided by programmable color temperature from daylight white 5000K to warm white 2700K and adjustable brightness

Create an appropriate atmosphere for a scene by the color and light adjustable lighting

- Programmable color and light adjustment from daylight white (5000K) to warm white 2700K
- Seamless lighting with completely eliminated dots
- Compact light appliance design which stores attachment parts

What is THOF®

THOF is a collective name for an original series from Luci with color and light adjustment. With the color and light adjustment functions, "color temperature" and "brightness" can be flexibly adjusted for each scene.

The concept is 'Hide'.

Don't want to see the product's body, but want enough light from cove lighting! But... In interior designing of cove lighting, we have difficulty hiding the light source. Basically, the ceiling height is limited. For hiding the light source and keeping enough light, considering the construction, about 300 mm distance is needed between ceiling place to the top of shield... Creide is the product which can solve such problems constructors might come across. This is because it is a product which is produced after thinking out a simple theme 'Hide'.

Luci Creide® F

Ideal cove lighting product hidden without shield and for the cove lighting whose space is limited.

Luci Creide® lens

"Luci Creide® lens" is a cove lighting for narrow spaces which focuses on beam angles and stretch of light. The fixture design is based on compact cross-sectional size and basic specification of "Luci Creide®". Special intensive luminous distribution by linear lens between LED and diffused cover creates an extended and smooth gradation of light.

Light can stretch up to 3 m, achieving an impressive effect on the illuminated surface.

Option parts

1 Mounting clip A for Creide **Attachment**

Model No : LCE-PT-A

Attached with LED fixture

- 1 pc for 150 mm
- 2 pcs for 300 mm and 510 mm
- 3 pcs for 880 mm and 1170 mm
- 4 pcs for 1460 mm

For extra order
2 pcs / bag

2 Outer clip for Creide

Model No : LCE-PT-B

2 pcs/bag

Recommended number

- 1 pc for 150 mm
- 2 pcs for 300 mm
- 3 pcs for 510 mm
- 4 pcs for 880 mm and 1170 mm
- 5 pcs for 1460 mm

3 Magnet Set L

Model No : MG-L

10 sets/bag

Required 2 pcs per Mounting clip A

Used for installing LED fixture with 1 Mounting clip A on metal plate.
Metal plate is required by installer.
Not available for Air Freight shipping

4 Magnet Set A

Model No : MG-A

5 sets/bag

Required 2 pcs per Outer clip

Used for installing LED fixture with 2 Outer clip for Creide on metal plate.
Metal plate is required by installer.
Not available for Air Freight shipping

5 Power supply cable 3M

Model No : CAD-3000-MCRN-I

1 pc per circuit for connecting the LED fixture to power supply or dimmer driver.

6 Joint cable 1M

Model No : CAD-1000-MCFC-I

Joint cable between two LED fixtures

Luci Creide® F / Luci Creide® lens

Installing the product

Mounting clip A installation: behind fixing

Recommended screw:
pan head screw M3

1 Mounting clip A for Creide (LCE-PT-A) Attachment

Recommend to use at least 3 pcs per meter with less than 380mm pitch.

Use three screws per one Mounting clip A.

Mounting clips should be installed in the position (as shown above).

Clasp the LED fixture onto the preset mounting clips (a click sound will be produced once it is tightly fastened).

Magnet installation

3 Magnet Set L (MG-L)

Ensure that there are no gaps in between fixture and surface

Outer clip installation

Recommended screw:
flat head screw M3

2 Outer clip for Creide (LCE-PT-B)

Recommend to use at least 3 pcs per meter with less than 380mm pitch.

Magnet installation

4 Magnet Set A (MG-A)

If the flat head screw is short and the plate does not tighten, please remove the washer.

For vertical installation

1 Mounting clip A for Creide (LCE-PT-A) Attachment

For vertical installation, make sure the LED fixture hook on the edge of the mounting clip in accordance to the diagram.
Caution: If the weight of the LED fixture is not supported by the edge of the mounting clip, it may slide down and fall.

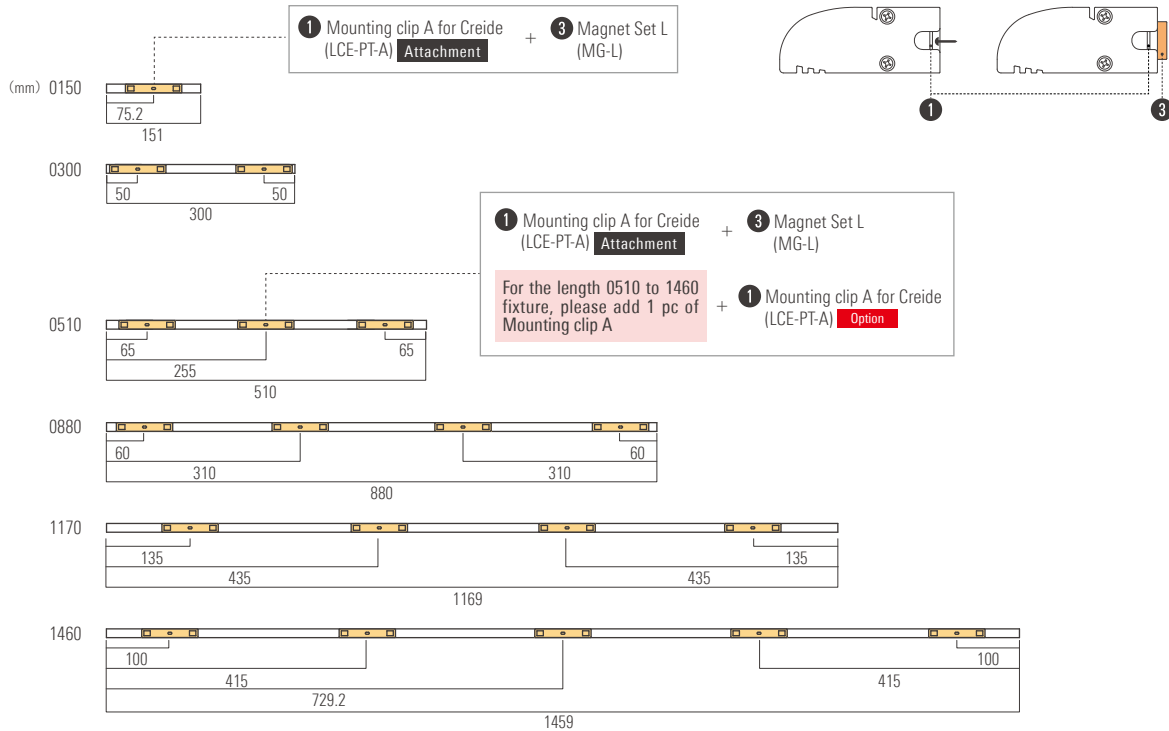

Recommended screw:
pan head screw M3

Secure 1 mounting clip with 3 screws
Caution: If using only 1 or 2 screws, the LED fixture may fall since the holding force is not enough.

Installing the product

Recommended number of Mounting clips for the installation

Recommended number of Outer clips for the installation

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

silux K

silux wide K

Power consumption

The low power consumption 4.3 W/m and 8.1 W/m have been added in silux K series to meet Energy-Efficient Lighting Design associated with Lighting power density (LPD) requirement.

These were developed for replying our customer's request in term of the trend of eco-friendly product and became our regular item.

LSXWK

Light distribution

You can choose from two types of light distribution. The square cross-section silux K emits light from the diffused cover, 12 mm on the top and 3 mm on both sides, so the light shines to the corners of the fixtures. With a quarter-circle shaped cross-section, the silux wide K can be used as a cove lighting or shelf lighted inside up evenly, as the light distribution is slightly inclined.

Color temperature

Wide range of color temperature with MacAdam 3 steps and >Ra 90, suitable for many applications. Luci developed original low color temperature 2100K and 2400K which is rare to be seen in market, for hotel preferred color.

Lumen output in 1008 mm

	silux K	silux wide K
13.3 W/m	581 lm	759 lm
8.1 W/m	421 lm	551 lm
4.3 W/m	199 lm	261 lm

Length Variation

Various length could be achieved by combining 10 lengths (from 74mm to 1451mm) of silux. Applicable to different usage and environment such as shelf, handrail and cove light.

Min. 74 mm

Max. 1451 mm

Option parts

1 Multiclip K for silux Attachment

Model No : LSX-PTM-C

Attached with LED fixture
3pcs for 702mm or shorter
5pcs for 823mm or longer

For extra order
3pcs/bag

2 Liftclip for silux

Model No : LSX-PTL
2 pcs/1 bag

Liftclip is for hiding the connector
behind the LED fixture.
There are two directions
of fixing the liftclip.

3 Outerclip for silux

Model No : LSX-PT-A
5 pcs/1 bag

Outerclip is for the downwards
emitting installation.

for multiclip installation

4 Magnet Set A

Model No : MG-A
5 pcs/1 bag

Used for installing LED fixture with 1 Multiclip clip on metal plate.
Metal plate is required by installer.
Not available for Air Freight shipping.

5 Magnet Set L

Model No : MG-L
10 pcs/1 bag

Used for installing LED fixture with 2 Lift clip on metal plate.
Metal plate is required by installer.
Not available for Air Freight shipping.

for liftclip installation

Power supply cable

6 Power supply cable 3M

Model No : CAD-3000-MCRN-I

1 pcs per circuit for connecting the LED fixture
to power supply or dimmer driver.

Joint cable

7 Joint cable 1M

Model No : CAD-1000-MCFC-I

Joint cable between two LED fixtures

Max. connectable length per power supply

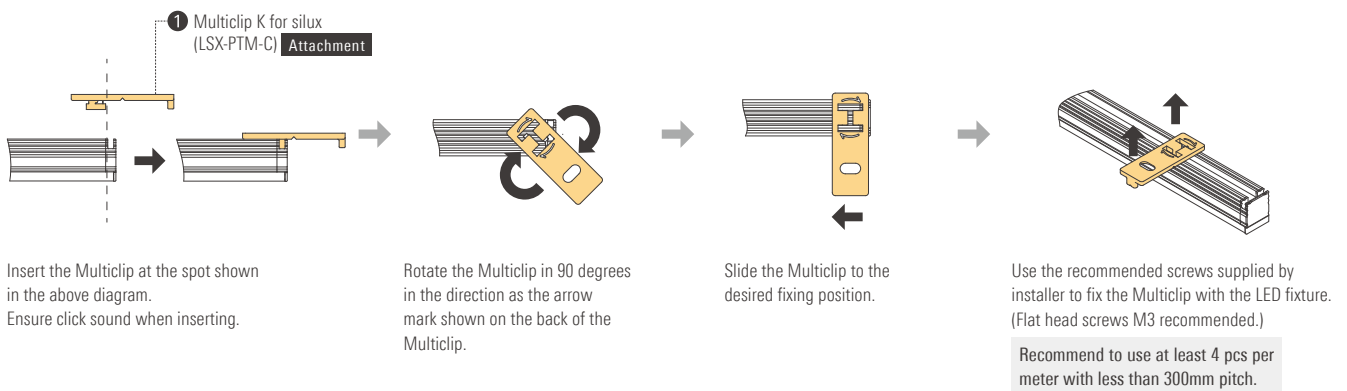

Length of LED fixture (70% loading factor) *: split into multiple circuits			Power supply
13.3 W/m	8.1 W/m	4.3 W/m	50W power supply
~2.6 m	~4.3 m	~8.7 m*	
~5.2 m	~8.7 m*	~17.5 m*	
~7.8 m*	~13.1 m*	~26.2 m*	
			100W power supply
			150W power supply

Installing the product

Multiclip K installation: behind fixing

Multiclip K installation: side fixing

Liftclip installation: Standard installation direction

Liftclip installation: Horizontal installation direction

Installing the product

Outerclip installation

Recommended screw:
flat head screw M3

3 Outerclip for silux
(LSX-PT-A)

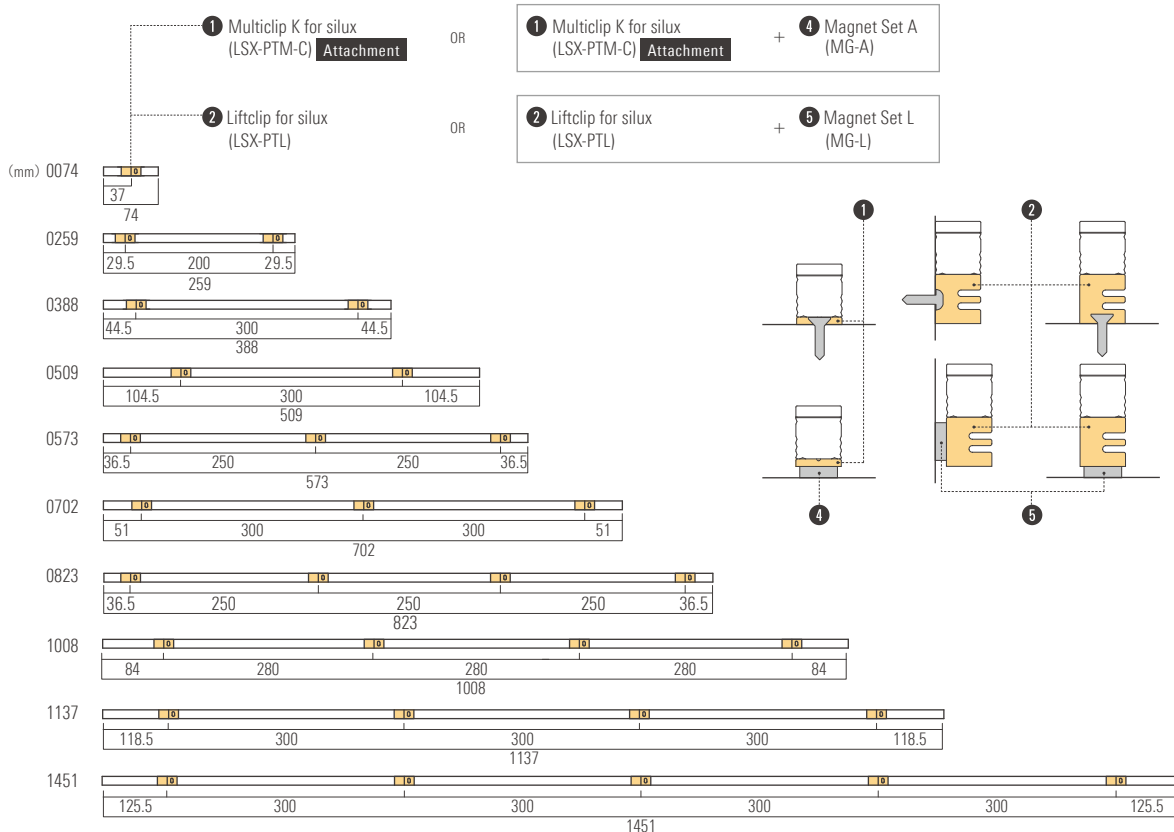

Recommend to use at least 4 pcs per meter with less than 300mm pitch.

For vertical installation

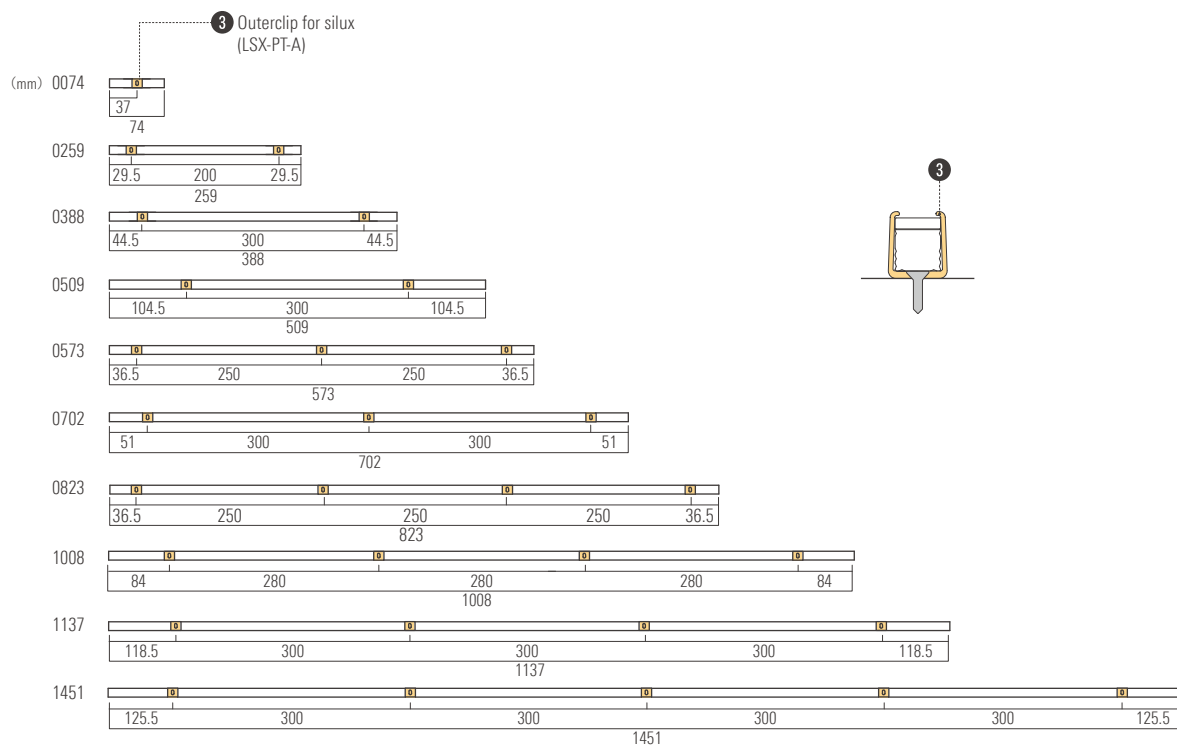

For vertical installation, make sure the top and bottom of LED fixture hook on the edge of the Multiclip K in accordance with the diagram.
Caution: If the weight of the LED fixture is not supported by the edge of the Multiclip, it may slide down and fall.

Recommended number of clips for the installation

Installing the product

Recommended number of clips for the installation

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Distance from wall

Multiclip K installation: side fixing

1 Multiclip K for silux (LSX-PTM-C) Attachment

Insert the Multiclip at the spot shown in the above diagram. Ensure click sound when inserting.

Rotate the Multiclip in 90 degrees in the direction as the arrow mark shown on the back of the Multiclip.

Slide the Multiclip to the desired fixing position.

Use the recommended screws supplied by installer to fix the Multiclip with the LED fixture. (Flat head screws M3 recommended.)

Recommend to use at least 4 pcs per meter with less than 300mm pitch.

Liftclip installation: Standard installation direction

2 Liftclip for silux (LSX-PTL)

Recommended screw: flat head screw M3

Recommend to use at least 4 pcs per meter with less than 300mm pitch.

Note: different screw type are required for different installation side.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

SIGNIEL

Compact lighting with a lamp fitting diameter of 15.2 mm

- High CRI LEDs reproduce a warm comfortable color tone.
- Absolutely no dark spots when joined.
- Built into a 15.2 mm diameter hard case.
- The lineup includes 10 lengths, 1007 mm to 107 mm.
- 5 color variations : White, Warm white 3500K, Warm white 3000K, Warm white 2700K and Warm white 2400K

5 color variations

(Regular size) 3 lengths	Model No.
length 1007mm	1000
length 507mm	0500
length 107mm	0100

*Other 7 lengths are available as special order product size.

Rotating adjustment is available.

Luci Slim Light

1 pc per circuit for connecting the LED fixture
to power supply or dimmer driver.

Luci Slim Light

Installing the product

Multiclip K installation: behind fixing

The Mounting clip A should be preset on the installation spot with screws supplied by installer.
(Pan head screws M4 recommended.)

Carefully fold the lead wire at the side of LED fixture and snap into the mounting clip together.

Pass the lead wire through the side and connect it. Bundle up the excess cable.

Turn on the light and adjust the angle.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Luci nano line

LNL

Luci nano line Indoor

Compact design lighting with a 5.5mm light-emitting surface.

Dotless and three-sided light emission from the front side and the side surfaces expands design possibilities in terms of exhibiting the light source.

The smart form allows a unique line lighting to materialize for fixtures, handrails, backs of mirrors, etc.

How to use Luci nano line

Wall-embedded vertical line lighting

The directly exposed narrow line light source adds some spice to a space.

Detail

Example image of embedding

Staircase riser indirect lighting

Indirect lighting on staircase risers helps recognition of stair steps, and has an effect of increasing safety while walking.

Detail

POINT Small indirect lighting source where reflecting surface is dot-less!

Conventional product → Luci nano line

Headboard lighting

Multiple indirect lighting sources around a bed create a sense of depth and a space for relaxation.

Detail

Handrail lighting

Light source embedded in a handrail shines on the wall and floor to increase visibility, resulting in prevention of falls while walking.

Wall-embedded horizontal line lighting

Horizontal line lighting provides a space with a sense of depth and expectation.

The magnets need to be fixed by installer.
Not available for Air Freight shipping.

Luci nano line

Installing the product

For horizontal installation

⚠ Cautions

Beware that there are two different types of fitting clips and one is for the main body and the other is for the end section.

⚠ Cautions

Ensure that the fitting clips for the end section are used.

The mounting clip should be preset on the installation spot with screws supplied by installer. (Pan head screws M2.6 recommended)

Attach LED fixture onto the mounting clips until click sound. Ensure that two mounting clips for the end section are installed at the end of LED fixture.

Mounting Clip A Recommended number of clips for the installation

Mounting Clip A \ Length	0109	0206	0303	0400	0498	0595	0692	0789	0886	0984
For the end part installation	2	2	2	2	2	2	2	2	2	2
For the body installation	0	0	0	1	1	1	2	2	2	2

For vertical installation

For vertical installation, make sure the top and bottom of LED fixture hook on the edge of the mounting clips in accordance with the diagram.

Caution: If the weight of the LED fixture is not supported by the edge of the mounting clips at the bottom, it may slide down and fall.

1 Mounting clip A for nano line (LNL-PTA) Attachment

Magnet installation

② Magnet for nano line (LNL-MG)

Loosen the screw of the magnet and slide it into the groove at the back of LED fixture.

Tighten the screw of the magnet by using small screwdriver at decided position.

⚠ Cautions

Small screwdriver is needed to tighten the screws of the magnets.

⚠ Cautions

Do not install LED fixture with magnets downwardly as it might fall.

Luci FLEX series

3 years warranty

Top bend

Luci Power FLEX EX

Our next FLEX standard with preferable price

- Renewed to High CRI LED package, >Ra90
- High-energy efficacy achieving up to 92.4lm/W
- 3 steps MacAdam ellipse LED package
- 5 types of wattage and lumen output (18.2W, 12.1W, 9.5W, 6.5W, 4.5W per meter)
- 3 types of LED pitch (15mm, 20mm, 30mm)
- No need to attach aluminum profile for heat sink
- Customized length available up to 5m per roll

Luci Power FLEX Spect C

- High color rendering Ra>96 in 6500K and 5000K
- Ideal for inspection lighting, museum, office lighting
- Covered with soft acrylic tube
- Cuttable every 6 LEDs (125 mm)

Luci Power FLEX THOF

Dynamic White

Dynamic white strip light

- Change atmosphere by tuning the color temperature
- Arrange 2 colors of LED package alternately
- 2 types of color range (1900K to 3000K, 2700K to 5000K)
- Cuttable every 4 LEDs (83.2mm)

Luci Power FLEX

- Short cuttable unit suitable for furniture lighting, and for unpredictable requirements on site (30mm in LFP15, 40mm in LFP20)
- 2 types of wattage (15.4W, 10.5W per meter)
- Customised length available up to 4.5m (LFP15), 5m (LFP20)

Luci Flat FLEX F

- Narrow LED pitch suitable for limited space installation (10mm pitch, 16mm pitch)
- Small section W10mm * H4mm
- 2 types of wattage (3.9W, 2.5W per meter)
- Customized length available up to 5m per roll

Why we use soft acrylic tube

-Maintain high transparency

Silicon is not contained in tube of Luci FLEX series.

Luci original soft acrylic prevents yellowing and preserves the original LED colors.

-High durability

The material properties of the tube for FLEX series are verified with resistant to secular changes such as deformation, discoloration, and deterioration by outdoor weather-resistant test* result.

-Protection against dust and external force

Compared to bare type LED strip, tube type LED strip is superior in terms of protection performance against external force and environmental factors which may cause damage to the circuit board and components.

Side bend

Luci Power FLEX α

High-powered LED strip with bending sideways

- Suitable for curved light trough
- Cuttable every 2 LEDs (40mm)
- Accessory for curved installation

Luci FLEX α F

- Low-powered LED strip with bending sideways
- Side view LED package
- Small bending radius (Min. R 50mm)
- Narrow LED pitch suitable for limited space installation (10mm pitch)
- Small section W4mm * H10mm
- Customized length available up to 5m per roll

Option parts

1 Mounting rail 1000 for Power FLEX
Model No : LFP-RL1000
5 Mounting clip for rail (5pcs) is included.

2 45° Mounting rail 1000 for Power FLEX **New**
Model No : LFP-45RL1000
5 Mounting clip for rail (5pcs) is included.

3 Aluminum mounting rail 1000 for Power FLEX **New**
Model No : LFP-RL1000-AL

4 Mounting clip for Power FLEX
Model No : LFP-RC
5 pcs / bag
For curved installation

5 Mounting clip for rail **Attachments for 1 & 2**
Model No : LFP-PT
For extra order, 5 pcs / bag

6 End cap for Power FLEX
Model No : LFP-EC
Attached with LED fixture on request
2 pcs / bag per LED fixture
For sealing the open end of LED fixture after cutting. Sealing glue is required to supply by installer. Acrylic glue is recommended.
For extra order, 2 pcs / bag

7 Magnet set for rail **New**
Model No : MG-R
4 pcs / bag
Used for installing LED fixture with mounting rail **1** or **3** on metal plate. Metal plate is required by installer. Not available for Air Freight shipping.

Luci Power FLEX EX

Installing the product

Straight installation

Magnet Installation

Mounting rail 1000 for Power FLEX

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
Recommended: 5 pcs per 1 m
* In case of Aluminum mounting rail 1000 for Power FLEX, Mounting clip for rail is not necessary.

Aluminum mounting rail 1000 for Power FLEX

Straight installation by 45 degree rail

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
Recommended: 5 pcs per 1 m

Curved installation

Minimum bending radius

Cutting of lamp fitting

The cuttable unit of Luci Power FLEX EX is 6 LEDs.

Failure will be caused by cutting on incorrect position.
End cap is required for sealing the open end of LED fixture after cutting.
Sealing glue should be supplied by installer. Acrylic glue is recommended.

System configuration diagram

1 Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)

2 If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.

3 To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

About Luci Spect C

Luci Power FLEX SpectC, an LED lighting instrument to reproduce natural light color (sunlight), helps to create an environment where there is no gap between interior (interior lighting) and exterior (sun light) conditions. Particularly, it is most suitable for detecting color unevenness in textile, printing and painting, for gemologist's appraisal on pearls or diamonds, and for evaluating cosmetic products requiring a colors evaluation under natural light condition.

Value of Ra96

The reproducibility of colors on illuminated objects by a light source is called "color rendering property". The benchmark of light source for color rendering property is sunlight, whose Ra ("average of color Rendering index") is defined as 100. That means color rendering property level is higher if Ra value is closer to 100. Luci Power FLEX SpectC maintains Ra96 in "average of Rendering index" (R1 to R8), while it also achieves high property value in "special color rendering index".

Cross sectional view when installing optional items

Option parts

1 Mounting rail 1000 for Power FLEX
 Model No : LFP-RL1000
 6 Mounting clip for rail (5pcs) is included.

3 45° Mounting rail 1000 for Power FLEX
 Model No : LFP-45RL1000
 6 Mounting clip for rail (5pcs) is included.

2 Mounting rail 900 for Power FLEX
 Model No : LFP-RL0900
 6 Mounting clip for rail (5pcs) is included.

4 Aluminum mounting rail 1000 for Power FLEX
 Model No : LFP-RL1000-AL

5 Mounting clip for Power FLEX
 Model No : LFP-RC
 5 pcs / bag
 For curved installation

6 Mounting clip for rail Attachments for 1 & 2 & 3
 Model No : LFP-PT
 For extra order, 5 pcs / bag

7 End cap for Power FLEX
 Model No : LFP-EC
 Attached with LED fixture on request
 2 pcs / bag per LED fixture
 For sealing the open end of LED fixture after cutting.
 Sealing glue is required to supply by installer.
 Acrylic glue is recommended.
 For extra order, 2 pcs / bag

8 Magnet set for rail **New**
 Model No : MG-R
 4 pcs / bag
 Used for installing LED fixture with mounting rail 1 or 2 or 3 on metal plate.
 Metal plate is required by installer.
 Not available for Air Freight shipping.

Luci Power FLEX

Installing the product

Straight installation

Magnet Installation

Mounting rail 1000 for Power FLEX

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
Recommended: 5 pcs per 1 m
* In case of Aluminum mounting rail 1000 for Power FLEX, Mounting clip for rail is not necessary.

Aluminum mounting rail 1000 for Power FLEX

Straight installation by 45 degree rail

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
Recommended: 5 pcs per 1 m

Curved installation

Minimum bending radius

Cutting of lamp fitting

The cuttable unit of Luci Power FLEX is 2 LEDs.

Failure will be caused by cutting on incorrect position.
End cap is required for sealing the open end of LED fixture after cutting.
Sealing glue should be supplied by installer. Acrylic glue is recommended.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Color temperature of diffuser tube type

Nominal light source color temperature		Color temperature through diffuser tube *1
D	7100 K	4300 K
N	5300 K	3800 K
W	4200 K	3300 K
WW	3500 K	2800 K
L30	3000 K	2500 K
L27	2700 K	2200 K
L24	2400 K	1900 K

*1:

The optical data provided on the above is for reference only. Due to the tolerances of the production process, values for color temperature can vary $\pm 10\%$. The lumen output value of diffuser tube type is 20~30% less than clear tube type.

In addition, non-uniform color among each package may be more pronounced when using the diffuser tube.

Installing the product

Straight installation

Magnet Installation

Mounting rail 1000 for Power FLEX

Curved installation

Cutting of lamp fitting

The cuttable unit of Luci Power FLEX α is 2 LEDs.

Failure will be caused by cutting on incorrect position.
End cap is required for sealing the open end of LED fixture after cutting.
Sealing glue should be supplied by installer. Acrylic glue is recommended.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Meticulous structural design for humidity-resistance will provide assurance of electrical safety in bathrooms and semi-outdoor

Safety and waterproofing structure

- Dot-free surface for reflective surface material

- High efficacy LED package with 3 steps Macadam
607 lm/m, 8.4 W/m in 2700K, Ra>93

- 5 color variations
4200K, 3500K, 3000K, 2700K, 2400K

- 5 length variations
162 mm, 302 mm, 582 mm, 862 mm, 1142 mm

- Optional aluminium channel for wall mounting
Ideal for vanity lighting purposes with high colour rendering and smooth lighting distribution

General Specification

Input voltage	DC24V
Environment	Bathroom, semi-outdoor, Moistureproof (IP65) ¹
Max. length per circuit	4.5m
Material (body)	Polycarbonate, PVC cable, IP65 connector
Material (cover, clip)	Polycarbonate
Material (mounting rail)	Aluminium
Attachments	① Mounting clip 2pcs for 582mm or shorter 3pcs for 862mm or longer
Option parts	① Mounting clip ② Mounting rail ③ Power supply cable
Certification	CE, Complied with JIS0920, IP65
Operating temperature	0°C ~ +35°C (No Condensation)
Dimmable	○
Power Supplies	Required

¹ Installing in a sauna, bathroom/shower room operated 24 hours a day is not allowed.

Max. connectable length per power supply

Length of LED fixture (70% loading factor) *: split into multiple circuits	Power supply
~4.1m	50W power supply
~8.3m*	100W power supply
~12.5m*	150W power supply

External dimensions

Prohibited installation places

- When using EFRO in semi-outdoor, it must be installed with the aluminum rail for EFRO. Please installed the LED fixture and the cable within the range of 45° eaves of the roof and 300 mm or more away from the ground or the floor. Please do not install the LED fixture and cables in the follow place:
- water directly fall on or pooled
 - the sunlight directly shines on
 - liquids including choline or chemicals fall on
 - high temperature and high humidity such as saunas
 - coastal areas which are affected by sea spray

Prohibited installation places:

- water directly fall on or pooled
- the sunlight directly shines on
- liquids including choline or chemicals fall on
- high temperature and high humidity such as saunas and public bath
- coastal areas which are affected by sea spray

Caution
Do not cut the LED fixture and the lead wire of outdoor product at a job site. Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

Cross sectional view

Option parts

1 Mounting clip for EFRO **Attachment**
 Model No : LRO-PT-A
 Attached with LED fixture
 2 pcs for 582 mm or shorter
 3 pcs for 862 mm or longer
 5 pcs for 983mm to 1463mm

- Holding LED fixture at both ends
- Angle adjustable
- Connectors can be put under the LED fixture
- Material: Clear polycarbonate

For extra order, 3 pcs / bag

Cautions: Use accurate number of Mounting parts
 Install 3pcs of Mounting clips at the middle and both edge sides of LED fixture if the LED fixture is longer than 862mm. Otherwise, the LED fixture will bow by its weight and may defect.

- Number of Mounting clips (LRO-PT-A)
 2 pcs for 582 mm or shorter
 3 pcs for 862 mm or longer

2 Aluminum mounting rail for EFRO ****
 Model No : LRO-RL****-AL
 ****. Length (0164/0304/0584/0864/1144)

3 End cap for aluminum rail (2 pcs/bag) is included.

- For easy and quick installation: unnecessary to pre-align the clips
- Connectors can be put under LED fixture
- Material

Rail: Aluminum, End cap: Semi-clear polycarbonate
 - Delivered with the same length as the product
 (Length variation: 164mm, 304mm, 584mm, 864mm, 1144mm)

Length	0164	0304	0584,0864,1144
A(mm)	30	50	100

3 End cap for aluminum rail **Attachment for 2**
 Model No : LRO-RL-EC
 Screws (4 pcs of Flat head, M3L8) are included

4 Power supply cable 5M for AH1 connector OD3.5 **Required**
 Model No : CAD-VA5000-FJNN-O

5 Connector cover for AH1 connector (1 pc/bag) is included

- Required for each circuit of LED fixture
- One side connector, one side bare wire
- 1 pcs of connector end cap (CC-MJ-O) is attached
- * to avoid water intrusion from the terminal connector of LED fixture

5 End cap for power supply cable **Attachment for 4**
 Model No : CC-MJ-O

Regin filled No electrode

Cautions: Waterproofing process for terminal connector
 The unenclosed connector at the terminal of LED fixture must be sealed with connector cover for AH1 connector which is attached with power supply cable (CAD-VA5000-FJNN-O). Make sure to rotate the fastening part until no longer can rotate.

EFRO IP65

Installing the product

Straight installation

Installation with Mounting Clip

Attach Mounting clip for EFRO (LRO-PT-A) at below position with screws supplied by installer (Pan head screws M4 recommended), and insert the LED fixture with considering the direction of the connector of power supply cable side. See below picture for holding the cable and connector underneath the LED fixture. Downwards installation is available as well.

1 Mounting clip for EFRO (LRO-PT-A) Attachment

Secure 1 mounting clip with 2 screws

Power supply cable side LED fixture side

Recommended position of Mounting clips

Power supply side of LED fixture

Between two LED fixtures

Terminal of LED fixture

1 Mounting clip for EFRO (LRO-PT-A) Attachment

5 Connector cover for AH1 connector (CC-MJ-O) Attachment for 1

The cable can be hooked at the slit of Mounting clip to prevent falling down.

Vertical installation

Make sure the bottom of LED fixture hook on the edge of the Mounting clip in accordance with the diagram.

Caution: If the weight of the LED fixture is not supported by the edge of the Mounting clip, it may slide down and fall.

Terminal of LED fixture

Connector cover for AH1 connector can be stored in the Mounting clip. Connecting the power supply cable at the top of LED fixture.

Installation with Mounting Rail

1. Attach Aluminum mounting rail for EFRO (LRO-RL****-AL) at below position with screws supplied by installer (Pan head screws M4 recommended)
2. Insert the LED fixture with considering the direction of the connector of power supply cable side.
3. After passing the cable through the cable outlet of the end cap, fix the end cap to the rail by screws attached with the products.

Note: The order of installation can be changed by the situation of the site.

Note: Please fix with the same number of screws as the number of screw holes.

2 Aluminum mounting rail for EFRO **** (LRO-RL****-AL)

Power supply cable side LED fixture side

3 End cap for aluminum rail (LRO-RL-EC) Attachment for 2

Position of connector

Power supply side of LED fixture
Below LED fixture

Between two LED fixture

Terminal of LED fixture
Below LED fixture

Outside of mounting rail

To reduce the gap of two LED fixtures, end caps are not necessary to use.

5 Connector cover for AH1 connector (CC-MJ-O) Attachment for 4

Make sure the bottom of LED fixture hook on the edge of the end cap for aluminum rail in accordance with the diagram.

Caution: If the weight of the LED fixture is not supported by the end cap for aluminum mounting rail, it may slide down and fall.

Terminal of LED fixture

Connector cover for AH1 connector can be stored in the Mounting rail. Connecting the power supply cable at the top of LED fixture.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

 Model No : LFT-RL0015
 10 pcs / bag
 1 Mounting clip for FLEX α rail (10 pcs / bag) is included.
 For curved installation

3 Mounting clip B for FLEX α
 Model No : LFX-RC-B
 10 pcs / bag
 Narrower clip used with rail 1 or parts 2

4 Mounting clip 1000 for FLEX α rail Attachments for 1 & 2
 Model No : LFX-RC
 for extra order, 10 pcs / bag

5 End cap for α Flat
 Model No : LFX-EC
 Attached with LED fixture on request
 2 pcs / bag per LED fixture
 For sealing the open end of LED fixture after cutting.
 Sealing glue is required to supply by installer.
 Acrylic glue is recommended.
 For extra order, 10 pcs / bag

Luci FLEX α F

Installing the product

Straight installation

Curved installation

Cutting of lamp fitting

The cuttable unit of Luci FLEX α is 6 LEDs.

Failure will be caused by cutting on incorrect position.
End cap is required for sealing the open end of LED fixture after cutting.
Sealing glue should be supplied by installer. Acrylic glue is recommended.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Location: Hong Kong
Client: Asia Standard Hotel Group Ltd.
Interior Design: atelier ikebuchi

MADE IN JAPAN

2 types of beam angle by extrude lens

Because of 120° light distribution, the scallop does not come out, even if the distance from the wall is less than 50mm. 35° type is suitable for grazing effect, 60° type is for wider effect. Highly recommended to use 150mm from the wall, in order to spread the light smoothly.

12 kinds of length variation

120 mm increments, min. 125mm and max. 1445 mm can be used for complicated shape of facade.

Max. connectable length is 9 m

Recommended where the power supply installation location and the light fixture location are apart from each other.

4 Color variations

4000K, 3500K, 3000K, 2700K

Easy dimming with 24 VDC low voltage power supply

Dimmable by any signal such as 0 - 10 V, DMX, DALI, etc, if you use an adaptive dimming driver, with simple wiring. Ideal for dimming the whole in synchronization. Although it is unsuitable for design that requires individual control.

High efficiency LED

Achieved 19.8 W/m, 1600 lm/m and 79 lm/W using Nichia high efficiency LED package.

Advanced waterproofing function design

- IP67 connector
- Heatproof fluororesin cable covered with weather resistance cover
- Line part : Encapsulated by silicon between aluminum heatsink and extrusion lens
End part : Encapsulated by silicon around cable, end cap and silicon bush for cable
- Polycarbonate protection cover covered by steel wire

Lifted mounting clip for preventing invasion of rain water

Required 1 pc per circuit for connecting the LED fixture to power supply or dimmer driver.
Terminal connector 1pc is attached with Power supply cable.
Please make sure to use it when not connecting both side lead wire type of LED fixture to the next LED fixture.

2 Joint cable EECC *mm

*(Length:mm)	500	1000	2000	4000	6000
Model No.	EECC220-805	EECC220-810	EECC220-820	EECC220-840	EECC220-860

Power LEDs Line IP65

Installing the product

Clip installation

Join the connectors. Make sure that they are correctly joined. Use the one side connector product (L-ELA9K2-*E**-24C-P) for the end of connection. Please make sure to use the terminal connector which is attached with Power supply cable EPYC220-8**K, when not connecting both side lead wire type of LED fixture to the next LED fixture.

⚠ Cautions

Not suitable to be fixed with a double-sided tape or adhesive.

⚠ Cautions

Do not cut off the connectors to use them. The waterproof performance will be lost. In order to avoid the exposure to direct sunlight, hide the connectors behind the lamp, etc.

⚠ Cautions

- Make sure that the installation site is flat.
- Before the construction, make sure to remove from the installation site any oil content, water drop, dust and so on.
- When installing the product downward or in a vertical direction, pay full attention in order to avoid dislocation, damage due to a fall and so on.
- Do not scratch or incise the lead wire. The waterproof performance will be lost.
- Make sure to insert the connector until it is completely locked. Otherwise it can lead to the lowering of the waterproof performance and contact failure.
- Do not remove the spring for fixing the protective cover. Even on the LED, shading of the light is hardly caused.

Minimum size for construction

Please keep the following size in order to avoid the temperature increase of the lamp. Any size that is smaller than the following may shorten the lamp's life.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

MADE IN JAPAN

Smooth light by dotless, three-sided emission

LEDs bar is ideal for under the bench and steps in the landscape. In particular, it is recommended when the surface to be irradiated is a glossy material. You don't need to make any light box for erasing the dots, and you don't need to worry about poor lighting effect caused by LED strips dropping from the aluminium profile.

Strip light

Dot-free type

12 kinds of length variation

120 mm increments, min.140mm and max. 1460 mm can be used for complicated shape installation.

Max. connectable length is 6.9 m

Recommended where the power supply installation location and the light fixture location are apart from each other.

4 Color variations with MacAdam 3 steps

4000K, 3500K, 3000K, 2700K

Available recessed installation for making exposed straight light effect

LEDs bar can be installed as exposed linear light in except for where the sun directly strike it. By using lift clip, the connector can be put below the LED fixture.

Easy dimming with 24 VDC low voltage power supply

Dimmable by any signal such as 0 - 10 V, DMX, DALI, etc, if you use an adaptive dimming driver, with simple wiring. Ideal for dimming the whole in synchronization. Although it is unsuitable for design that requires individual control.

High efficiency LED

Achieved 7.7 W/m, 780 lm/m and 101.3 lm/W using Nichia high efficiency LED package.

Advanced waterproofing function design

- IP67 connector (Japanese brand)
- Heatproof fluoro-resin cable covered with weather resistance
- Cylindrical extruded polycarbonate diffused cover. Encapsulated by silicon around cable and Polycarbonate end cap.

Comparison of the distance from wall

L-ELS7K1

General Specification

Input voltage	DC24V
Environment	In & Outdoors (no condensation) IP65
Max. sets connectable	6.9m
Ambient temperature / humidity	-5~40°C, 25~95%RH (no condensation)
Storage temperature / humidity	-15~55°C, 25~85%RH (no condensation)
Material (body)	Polycarbonate
Attachments	Mounting clip
Option parts	① Mounting clip ② Power supply cable ③ Joint cable
Dimmable	○
Power Supplies	Required
COO	Japan

External dimensions

Both ends lead wire

One end lead wire

Prohibited installation places:

- water directly fall on or pooled
- liquids including choline or chemicals fall on
- high temperature and high humidity such as saunas and public bath
- coastal areas which are affected by sea spray

Caution:

Do not cut the lead wire of outdoor product at a job site. Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

Cross sectional view

Option parts

1 Mounting clip for LEDs Bar IP65 **Attachment**

Model No : ELS7K-FS
 Attached with LED fixture
 2 pcs for 143mm to 383mm
 3 pcs for 503mm to 863mm
 5 pcs for 983mm to 1463mm
 For extra order, 2 pcs / bag

2 Lift clip for LEDs Bar IP65

Model No : ELS7K-FH
 2 pcs / bag
 Recommended number
 2 pcs for 143mm to 383mm
 3 pcs for 503mm to 863mm
 5 pcs for 983mm to 1463mm

3 Power supply cable EPYC *mm **Required**

Model No.	EPYJ220-305-K	EPYJ220-310-K	EPYJ220-320-K	EPYJ220-340-K

⚠ Check the label on the DC + side for polarity.

4 Joint cable EEJJ *mm

*(Length:mm)	500	1000	2000	4000	6000
Model No.	EEJJ220-305	EEJJ220-310	EEJJ220-320	EEJJ220-340	EEJJ220-360

LEDs Bar IP65

Installing the product

Clip installation

Fix the lamp on the installation site with the attached Mounting clips and screws (round head screw M3.1 x 16).

⚠ Cautions

Not suitable to be fixed with a double-sided tape or adhesive.

Join the connectors. Make sure that they are correctly joined. Use the one side connector product (L-ELS7K1-xxxE*-24) for the end of connection.

⚠ Cautions

Do not cut off the connectors to use them. The waterproof performance will be lost.

Place the lead towards the direction according to each usage.

⚠ Cautions

In order to avoid the exposure to direct sunlight, hide the connectors behind the lamp, etc.

⚠ Cautions

- Make sure that the installation site is flat.
- Before the construction, make sure to remove from the installation site any oil content, water drop, dust and so on.
- When installing the product downward or in a vertical direction, pay full attention in order to avoid dislocation, damage due to a fall and so on.
- Do not scratch or incise the lead wire. The waterproof performance will be lost.
- Make sure to insert the connector until it is completely locked. Otherwise it can lead to the lowering of the waterproof performance and contact failure.

Minimum size for construction

Please keep the following size in order to avoid the temperature increase of the lamp. Any size that is smaller than the following may shorten the lamp's life.

1 Mounting clip for LEDs Bar IP65

2 Lift clip for LEDs Bar IP65

System configuration diagram

- 1 Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- 2 If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- 3 To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

LEDs Line Hi IP67

L-ELR9K2

LEDs Line Hi IP67

Linear light with UV protected semi diffused polycarbonate cover

Application

Ideal for directing light on lines on the outside wall.

Sapporo PARCO
Location: JAPAN

HOTEL BAR GRANTIOS
Location: JAPAN
Architect office: Plus F

Pacific Royal Court Minato Mirai
Location: JAPAN

MADE IN JAPAN

IP67 linear lighting

LEDs Line Hi meet IP67 so that can be used as in a harsh environment such as under steps in a landscape area.

12 kinds of length variation

120 mm increments, min.140mm and max. 1460 mm can be used for complicated shape installation.

Easy dimming with 24 VDC low voltage power supply

Dimmable by any signal such as 0 - 10 V, DMX, DALI, etc, if you use an adaptive dimming driver, with simple wiring. Ideal for dimming the whole in synchronization. Although it is unsuitable for design that requires individual control.

UV protected, semi diffused LED

Also, ideal for exposed line light on the outside wall. By applying ultraviolet deterioration prevention paint on the surface of LEDs Line Hi, it can be installed in places where direct sunlight strikes it. Semi diffused cover is maintaining high luminance for easy recognition when seeing it from a distance. However, if you look at it from a distance far, it looks like a single continuous line.

Max. connectable length is 6.9 m

Recommended where the power supply installation location and the light fixture location are apart from each other.

4 Color variations

4000K, 3500K, 3000K, 2700K

High efficiency LED, 100 lm/W

Achieved 7.7 W/m, 780 lm/m and 101.3 lm/W using Nichia high efficiency LED package.

Advanced waterproofing function design

- IP67 connector (Japanese brand)
 - Heatproof fluororesin cable covered with weather resistance cover
 - Cylindrical extruded polycarbonate semi-diffused cover
- Three step protection structure**
- Double polycarbonate end cap
 - Encapsulated by silicon around cable and polycarbonate end cap
 - Silicon O ring for cable

Comparison of the distance from wall

Luci UQ FLEX α IP67

Side bend type will be added in UQ FLEX Series.

(Provisional specification)

- W 10mm x H 20m, 400 lm/m in 17W/m
- Body: Sylicon, Cable: Sylicon, IP68 connector
- Monting clip and bendable mounting rail for curved installation

Please contact Luci sales representative for further information.

Indoor	max 2m	max 5m

Prohibited installation places

Do not cut the LED fixture and the lead wire of outdoor product at a job site. Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

- pooling water
- liquids including choline or chemicals fall on
- high temperature and high humidity such as saunas
- coastal areas which are affected by sea spray

Option parts

1 Aluminum Mounting Rail A Type 950 for UQ FLEX H13
Model No : LFU-RL0950-AL-A

Number of holes : 4
* Specification may subject to change.

2 Mounthing Clip for UQ FLEX Attachment
Model No : LFU-RC
Attached with LED fixture for extra order, 5 pcs / bag

Length	~0.5m	~1m	~2m	~3m	~4m	~5m
pcs	2	3	5	7	9	11

3 SUS hold clip A for UQ FLEX AL rail
Model No : LFU-PT-A
5 pcs / bag
Recommended number min. 3 pcs /m
For high rise building, secure to hold LED fixture in the mounting rail

4 PC hold clip B for UQ FLEX AL rail
Model No : LFU-PT-B
5 pcs / bag
Recommended number min. 3 pcs /m
For the place close to eye level

5 Power supply cable 10M for UQ FLEX **Required**
Model No : CAD-V010M-FKNN-O
Connector cap (1 pc) is attached

※ Connector cap is attached.

6 Joint cable 1M for UQ FLEX
Model No : CAD-1000-MKFK-O

Max. connectable length per power supply

Length of LED fixture (70% loading factor) *: split into multiple circuits			Power supply
15.8W/m	12W/m	8W/m	100W power supply
~2.2m	~2.9m	~4.3m	
~4.4m	~5.8m	~8.7m	50W power supply
~6.6m	~8.7m	~13.1m*	150W power supply

Luci UQ FLEX IP67

Installing the product

Installation with Mounting Clip

Straight installation

Fix the mounting clip by 2 pcs of screws supplied by installer (Pan head screw M4 recommended).

Curved installation

UQ FLEX can be installed in curved surface as below picture. The minimum bending radius is 150 mm.

Caution:

Do not bend the LED fixture to side direction. If bend it wrongly, FPC (flexible printed circuit board) will be damaged and the lighting fixture will not turn on.

Do not twist the LED fixture as it will damage and break the FPC (flexible printed circuit board) and the lighting fixture will not turn on.

Mounting clips at both ends should be far from 50 mm or more from the side cap.
Keep the distance between mounting clips the same. (400 mm to 500 mm recommended)

Length(mm)	100~500	600~1000	1100~2000	2100~3000	3100~4000	4100~5000
2 Mounting Clip for UQ FLEX	2	3	5	7	9	11

*Maximum custom length when use Mounting clip for UQ FLEX is,
for outdoor usage: max. 2m
for indoor usage: max. 5m

Ensure the pin holes in the connectors are positioned correctly before joining them. To fasten, rotate the metallic knobs until tightened

Caution:

The unenclosed connector at the terminal of UQ FLEX must be sealed with connector cap which is enveloped in the power supply cable(CAD-V010M-FKNN-0). To fasten, rotate the metallic knobs until tightend.

Installation with Mounting rail

Fix the aluminum rail by screws supplied by installer (Pan head screw M4 recommended).

1 Aluminum Mounting Rail A Type 950 for UQ FLEX H13 (LFU-RL0950-AL-A)

Hold one side of the lighting fixture and push on the other side, the lamp will gradually enter the aluminum rail.

Caution:

Do not bend the LED fixture to side direction. If bend it wrongly, FPC (flexible printed circuit board) will be damaged and the lighting fixture will not turn on.

Push the SUS hold clip (LFU-PT-A) or PC hold clip (LFU-PT-B) until click sound and make sure it is securely locked. SUS hold clip is recommended in the environment where requires the durability.

3 SUS hold clip A for UQ FLEX AL rail (LFU-PT-A)

4 PC hold clip B for UQ FLEX AL rail (LFU-PT-B)

Length(mm)	100~500	600~1000	1100~2000
3 SUS hold clip A for UQ FLEX AL rail			
4 PC hold clip B for UQ FLEX AL rail	2	3	5

*Maximum custom length when use Aluminium rail for UQ FLEX is 2m.

Aluminum rail cut

The aluminium rail a type (LFU-RL0950-AL-A) can be cut according to the length of lighting fixture. Aluminum rail mounting holes can also be made at the site by the installer.

Luci UQ FLEX IP67

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Max. connectable length per power supply

Length of LED fixture (70% loading factor) *: split into multiple circuits			Power supply
15.8W/m	12W/m	8W/m	
~2.2m	~2.9m	~4.3m	100W power supply
~4.4m	~5.8m	~8.7m	50W power supply
~6.6m	~8.7m	~13.1m*	150W power supply

Luci FLEX IP65 series

3 years warranty

Top bend

Luci Power FLEX EX IP65

- Our next FLEX standard with preferable price
- Renewed to High CRI LED package, >Ra90
 - High-energy efficacy achieving up to 92.4lm/W
 - 3 steps MacAdam ellipse LED package
 - 5 types of wattage and lumen output (18.2W, 12.1W, 9.5W, 6.5W, 4.5W per meter)
 - 3 types of LED pitch (15mm, 20mm, 30mm)
 - No need to attach aluminum profile for heat sink
 - Customized length available up to 3.5m(LFPEX15), 5m(LFPEX20,30) per roll

Luci Power FLEX IP65

- Customized length available (LFP15: up to 4.5m, 30mm increment, LFP20: up to 5m 20mm increment)
- 2 types of wattage (15.4W, 10.5W per meter)
- Ideal for projects that have various length requirement

Luci Flat FLEX F IP65

- Narrow LED pitch suitable for limited space installation (10mm pitch, 16mm pitch)
- Small section W10mm * H4mm
- 2 types of wattage (3.9W, 2.5W per meter)
- Customized length available up to 5m per roll

Application

Top bend

Facade indirect light powder room

Mirror light for powder room

Side bend

Handrail

Under bench / steps

Side bend

Luci FLEX α KINU IP65 New

- Semi-diffused, emitting a more dot-free light effect
- IP65 with improved waterproofing structure
- 4 Color variations (4200K, 3000K, 2700K, 2400K), 4.8W/m, 46.5lm/W in 2700K
- Customized length availability up to 5 m (50 mm increment)
Long wiring maximum 80 m is possible (VCTF 0.75 sq)
- Landscape optimized installation: bendable rails to cater curve installation, neater & compact wiring system in the rail

Semi-diffused

Compared with normal FLEX α, KINU can emit more dot-free light. When looking up the stairs etc, there is no light of the dot, and you can direct a space with a more luxurious feeling.

IP65 with improved waterproof structure

Landscape optimized installation

Designed to solve various problems occurring during construction depending on the bending rails of aluminum.

Bending Rail attachable to a curve

The aluminum rail can pass the wiring for another system inside

easy installation by mounting clip

Luci FLEX α F IP65

- Low-powered LED strip with bending sideways
- Side view LED package
- Small bending radius (Min. R 50mm)
- Narrow LED pitch suitable for limited space installation (10mm pitch)
- Small section W4mm * H10mm
- Customized length available up to 5m per roll

General Specification

Input voltage	DC24V
LED beam angle	120°
Environment	In & Outdoors (no condensation)
Max. length per circuit	15 mm pitch : 4.5m 20 mm pitch : 5m
Min. bending range	R50mm
Material (body)	Soft acrylic
Attachments	-
Option parts	①②③④ Mounting rail ⑤⑥ Mounting clip ⑦ Power supply cable
Certification	CE
Dimmable	○
Power Supplies	Required

External dimensions

Max. connectable length per power supply

Length of LED fixture (70% loading factor) *: split into multiple circuits		Power supply
15mm pitch	20mm pitch	
~2.2m	~3.3m	50W power supply
~4.5m	~6.6m*	100W power supply
~6.8m*	~10m*	150W power supply

Prohibited installation places:

- water directly fall on or pooled
- the sunlight directly shines on
- liquids including choline or chemicals fall on
- high temperature and high humidity such as saunas
- coastal areas which are affected by sea spray

Caution:

Do not cut the LED fixture and the lead wire of outdoor product at a job site. Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

Cross sectional view when installing optional items

Option parts

1 Mounting rail 1000 for Power FLEX
 Model No : LFP-RL1000
 ⑥ Mounting clip for rail (5pcs) is included.

3 45° Mounting rail 1000 for Power FLEX
 Model No : LFP-45RL1000
 ⑥ Mounting clip for rail (5pcs) is included.

2 Mounting rail 900 for Power FLEX
 Model No : LFP-RL0900
 ⑥ Mounting clip for rail (5pcs) is included.

4 Aluminum mounting rail 1000 for Power FLEX
 Model No : LFP-RL1000-AL

5 Mounting clip for Power FLEX
 Model No : LFP-RC
 5 pcs / bag
 For curved installation

6 Mounting clip for rail **Attachments for 1 & 2 & 3**
 Model No : LFP-PT
 For extra order, 5 pcs / bag

7 Outdoor cable 3M TR connector for FLEX **Required**
 Model No : CAD-3000-MEFE-0
 1 pc per circuit for connecting the LED fixture to power supply or dimmer driver.

Luci Power FLEX IP65

Installing the product

Straight installation

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
 Recommended: 5 pcs per 1 m
 * In case of Aluminum mounting rail 1000 for Power FLEX, Mounting clip for rail is not necessary.

Straight installation by 45 degree rail

Cove lighting

Cornice lighting

For downward installation, mounting clips for rail can prevent falling.
 Recommended: 5 pcs per 1 m

Curved installation

Minimum bending radius

System configuration diagram

① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)

② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.

③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Color temperature of diffuser tube type

Nominal light source color temperature (clear tube)	Color temperature through diffuser tube *1	
D	7100 K	4300 K
N	5300 K	3800 K
W	4200 K	3300 K
WW	3500 K	2800 K
L30	3000 K	2500 K
L27	2700 K	2200 K
L24	2400 K	1900 K

*1:

The optical data provided on the above is for reference only. Due to the tolerances of the production process, values for color temperature can vary ±10%. The lumen output value of diffuser tube type is 20~30% less than clear tube type.

In addition, non-uniform color among each package may be more pronounced when using the diffuser tube.

Luci FLEX α KINU IP65 / one end lead wire

Cross sectional view when installing optional items

Option parts

1 Mounting lift rail 1000 for FLEX α KINU
 Model No : LFXK-RL1000AL-A
2 Mounting clip for FLEX α KINU AL rail (LFXK-PT-A 10 pcs / bag) is attached.
 Bendable aluminum rail
 The connector can be stored in this mounting rail.

2 Mounting clip for FLEX α KINU lift rail **Attachment for 1**
 Model No : LFXK-PT-A
 10 pcs / bag
 Mounting Clip is used for assembling rail and light fixture.
 for extra order, 10 pcs / bag

3 Power supply cable 10m for AH1 connector OD 5.0 **Required**
 Model No : CAD-VB010M-FJNN-O
 1 pc per circuit for connecting the LED fixture to power supply or dimmer driver.

4 End cap for power supply cable
 Model No : CAC-MJ-O

Prohibited installation places

When using FLEX α KINU in semi-outdoor, it must be installed with the aluminum rail for FLEX α KINU. Please installed the LED fixture and the cable within the range of 45° eaves of the roof and 150 mm or more away from the ground or the floor. Please do not install the LED fixture and cables in the following place:

- water directly fall on or pooled
- the sunlight directly shines on
- liquids including chlorine or chemicals fall on
- high temperature and high humidity such as saunas
- coastal areas which are affected by sea spray

Caution:

Do not cut the LED fixture and the lead wire of outdoor product at a job site.
 Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

Luci FLEX α KINU IP65

Installing the product

For horizontal installation

- ① Fix Mounting rail with screws supplied by installer (Pan head screws M5). LED fixture and Mounting rail can be bent horizontally at minimum radius 150mm.
- ※ Please fix with the same number of screws as the number of screw holes.

Caution:

Do not bend LED fixture and Mounting rail vertically and do not twist the LED fixture. LED fixture and Mounting rail might be damaged when it is twisted and bent improperly.

- ② Attach Mounting clips for rail to Mounting rail every 100mm as below picture. (Recommended number of clips: 3pcs for 300mm, 6pcs for 600mm, 10pcs for 1000mm)

- ② Mounting clip for FLEX α KINU lift rail (LFXK-PT-A)

Installation of Mounting clip

Tilt and hook one side of Mounting clip to Mounting rail, rotate clips and insert another side of clip until click sounds.

- ③ Check the direction of emitting surface and insert LED fixture into Mounting clips.

Installation of LED fixture in Mounting clip

Insert LED fixture until the position as below.

Caution:

Please be careful not to push LED fixture hardly and damage LED fixture, electric parts, circuit board by finger or tools. It might cause a defect.

- ④ Connect the connector attached with LED fixture and the connector of power supply cable in proper position. Make sure to rotate the fastening part until no longer can rotate.

- ③ Power supply cable 10m for AH1 connector OD 5.0 **Required** (CAD-VB010M-FJNN-O)

For installing on sloping surface

- ① Fold the side of Mounting rail under Mounting clip by hand.

Caution:

Make sure to do this procedure. Otherwise, it may cause slipping and falling of LED fixture from Mounting rail and clips.

- ② Adjust the position of Mounting clips being hooked at the folded part of Mounting rail to avoid falling.

Caution:

This product cannot be used in vertical installation. Do not install LED fixture and Mounting rail more than 45 degree. The mounting clip might slip and LED fixture might drop from Mounting rail.

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)

Cable	Max.distance
UL2464 AWG20	45m
VCTF 0.75sq	80m

Dimmer & Power supply

For DC24V single color series PX24606series Constant Voltage - Dimmable driver (DC input) - 1ch DMX Driver 3A x 1chDimmable driver (DC input) - 1ch EUCHIPS

- Meets DMX512/1990
- 1 output CH.,can drive 3A
- With control system,can express perfect effect
- Can set the DMX512 address freely
- Modularizing,can be combined with LED module neatly

Wiring Diagram

Specification

Product name	DMX Driver 3A*1ch
Model number	PX24606
Input voltage	12V - 24V
Output channel	1ch 3A
Size	86*51*17.8(mm)
Weight	110g
Usage enviroment	Indoor(no condensation)
Oparating enviroment temprature	-20℃ ~ 70℃

Maximum wiring distance from **A** - **A** is 10m/20m.Please refer to manuals of each product. Please check the maximum of connectable LED length in one series referring to the catalog page of each product.

When the LED total length exceeds the maximum length in series, please connect by separating into several circuit.

Twist shield cable is recommended to use as a signal cable.

For DC24V single color series DALI6010 Constant Voltage - Dimmable driver (DC input) - 1ch DALI Driver 10A x 1ch EUCHIPS

- Single channel constant voltage output , 10A
- Meet DALI protocol IEC 62386
- Dimming range from 0.1-100%
- PWM digital dimming, no alter LED color rendering index
- Suitable for indoor LED lighting application
- Protections: Short circuit, over load, over temperature

Wiring Diagram

Specification

Product name	DALI Driver 10A*1ch
Model number	DALI6010
Input voltage	12V - 24V
Output channel	1ch 10A
Size	168*39*30(mm)
Weight	124g
Usage enviroment	Indoor(no condensation)
Oparating enviroment temprature	-20℃ ~ 50℃

Maximum wiring distance from **A** - **A** is 10m/20m.Please refer to manuals of each product. Please check the maximum of connectable LED length in one series referring to the catalog page of each product.

When the LED total length exceeds the maximum length in series, please connect by separating into several circuit.

Twist shield cable is recommended to use as a signal cable.

* Please read and follow the specification and the instruction manual issued by the manufacturer of controller and driver. The specification may be subject to change without prior notice.

Dimmer

For DC24V single color series DIM-S1L10V-0 Constant Voltage - Dimmable driver (DC input) - 1ch 0-10V/1-10V Driver 10A x 1ch EUCHIPS

Specification

Product name	Dimmer Driver 0-10V/1-10V
Model number	DIM-S1L10V-0
Input voltage	DC12~24V
Output channel	1ch MAX 10A per 1channel
Size	175 × 56 × 28(mm)
Weight	-
Usage enviroment	Indoors (no condensation)
Oparating enviroment temprature	-

- Analog Signal driver, receive 0-10V/1-10V dimsignal.
- 1channel output, MAX 10A per 1ch.*Connectable 80% load=8A of LED
- Over-temperature protection

Wiring Diagram

Maximum wiring distance from **A** - **A** is 10m/20m. Please refer to manuals of each product. Please check the maximum of connectable LED length in one series referring to the catalog page of each product.

When the LED total length exceeds the maximum length in series, please connect by separating into several circuit.

Twist shield cable is recommended to use as a signal cable.

For single color series Walldim 103E1 Dimmer controller - 1ch 1-10V Dimmer Controller EUCHIPS

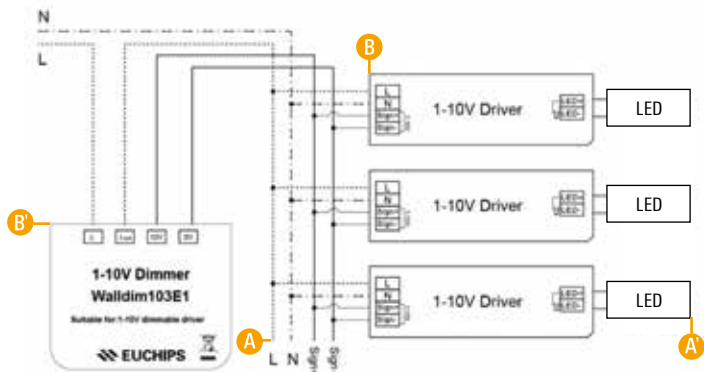

Specification

Product name	1-10V dimmer
Model number	Walldim 103E1
Input voltage	200 - 240V
Output channel	1ch 10A
Size	86*86*42(mm)
Weight	140g
Usage enviroment	Indoor(no condensation)
Oparating enviroment temprature	-10℃ ~ 55℃

- Analog Signal driver, receive 1-10V dimsignal.

Wiring Diagram

Maximum wiring distance from **A** - **A** is 20m.

Maximum wiring distance from **B** - **B** is 20m.

Please check the maximum of connectable LED length in one series referring to the catalog page of each product. When the LED total length exceeds the maximum length in series, please connect by separating into several circuit.

Twist shield cable is recommended to use as a signal cable.

* Please read and follow the specification and the instruction manual issued by the manufacturer of controller and driver. The specification may be subject to change without prior notice.

Dimmer & Power supply

For DC24V single color series PWM-120-24 Constant Voltage - Dimmable driver (AC input) - 1ch Dimmable power supply IP67 Meanwell

- DC 24V constant voltage dimmable power supply
- IP67 waterproof
- 3 in 1 dimming function 0-10V, PWM, resistance

Wiring Diagram

Specification

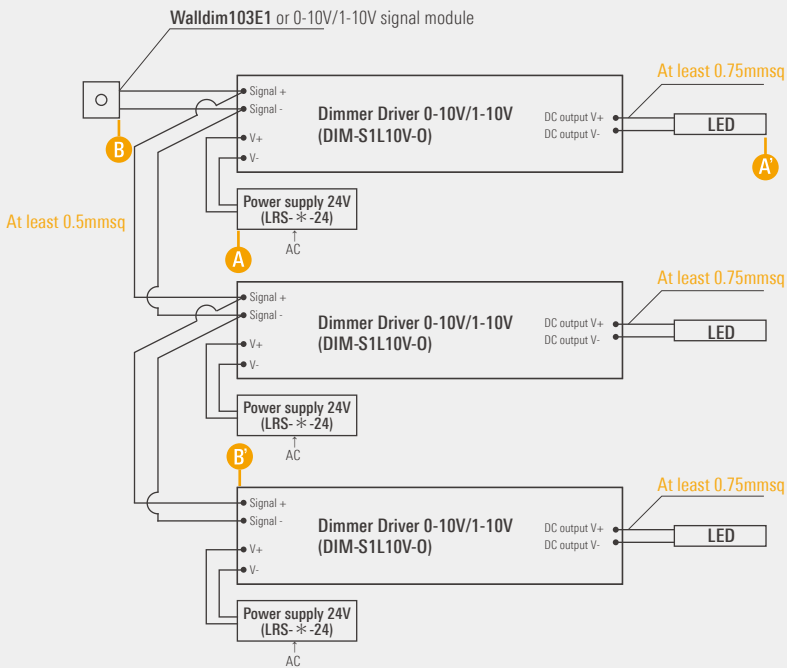

Product name	120W PWM 24V dimmable driver
Model number	PWM-120-24
Input voltage	90 - 305 VAC
Output channel	24V 5A
Size	191*63*37.5(mm)
Weight	100g
IP rating	67
Operating environment temperature	-45℃ ~ 90℃

Twist shield cable is recommended to use as a signal cable.

- Dimmed manually by Walldim103E1 or Dimmed with Control System.

Cables -> Supplied by the installer

Maximum wiring distance from **A** power supply to **A'** end of LED fixture is 10~20m, please refer to the specification page of each product.
 Maximum diming signal wiring distance from **B** to **B'** is 20m, connectable up to 20 pcs of DIM-S1L10V-0 in one dimming circuit
 Please check the maximum of connectable LED length in one series referring to the catalog page of each product.
 When the LED total length exceeds the maximum length in series, please connect by separating into several circuit.

Dimmer

For DC24V Dynamic white series DIM-S2L8V-0 Constant Voltage - Dimmable driver (DC input) - 2ch 0-10V/1-10V Driver 8A, 2ch EUCHIPS

- Support 3-in-1 dimming function(0-10V /1-10V active signal, Adjustable resistance, PWM)
- Support dimming mode selectionc
- Support the short circuit, over current protection and alarm functionc
- Logarithmic dimming curve
- Built-in CCT adjust mode, the user can adjust color temperature without changing the output power
- For adjusting the brightness/ color temperature of LED strip

Wiring Diagram

Specification

Product name	12-24VDC 0-10V analog constant voltage led dimmer
Model number	DIM-S2L8V-0
Input voltage	12V - 24V
Output channel	2ch total 8A
Size	167*51*23(mm)
Weight	100g
Usage enviroment	Indoor(no condensation)
Oparating enviroment temprature	-

Twist shield cable is recommended to use as a signal cable.

Connectable length per dimmerble driver (DIM-S2L8V)

ex. when using 150W PSU, 60% load factor

Model No.	Output (W/m)	Max. length per circuit (m)	Connectable length per one driver (m)	W (VA)
LFPTH-1000-*CL-I	11	5	8.1*	89.1
LTH-1000-*DF-I	31.2	4	2.8	87.4

*Split into multiple circuit

For Dynamic white series Walldim 202 Dimmer controller - 2ch 2ch Multi Function Panel Controller EUCHIPS

- Supply voltage of 12-15VDC
- Output 2 channels 0-10V analog dimming signal
- Can adjust brightness and color temperature of lamps
- Show the current brightness or color grades
- can be installed in compliance with DIN 49073 and 86 standard wall box

Wiring Diagram

Specification

Product name	Multi-Function Touch Panel Controller
Model number	Walldim202
Input voltage	12V - 15V
Output channel	50mA 2ch
Size	86*86*26(mm)
Weight	140g
Usage enviroment	Indoor(no condensation)
Oparating enviroment temprature	-10℃ ~ 40℃

Twist shield cable is recommended to use as a signal cable.

* Please read and follow the specification and the instruction manual issued by the manufacturer of controller and driver. The specification may be subject to change without prior notice.

Dimmer & Power supply

For Vivoxy Graze HVGC-*.B Constant Current - Dimmable driver (AC input) - 1ch Constant Current dimmable driver IP67 Meanwell

- Wide input range 180 ~ 528 VAC
- Constant current mode output
- Metal housing with class I design
- IP67 / IP65 design for indoor or outdoor installations
- Function options:
output adjustable via potentiometer; 3 in 1 dimming (dim-to-off); Timer dimming

Wiring Diagram

Twist shield cable is recommended to use as a signal cable.

Power Supply

With thorough quality control,
Luci continues to make products that customers can
use with confidence

Available for project in JAPAN

Quality policy of Luci ORILEGA

- In-house designed electric circuit and housing
- Reliability test and safety test conducted by our company and third-party test laboratory
- Ongoing operation test in high-temperature circumstance (60°C)
- Production process under Luci own standards and one hundred percent inspection

Luci ORILEGA conforms to various standards

PSE certified range: AC100 - 242V

ORILEGA is PSE compliant at all voltages. Voltage range that can be used not only in Japan but also in many overseas countries.

Quiet structure conforming to JIS

Reduced sound generation due to coil vibration during PWM dimming, maintaining operating noise in 25 dB or less. Meets the requirements of JIS C 8115 sound level.

Meets JIS C 8115
sound level requirements

Complied with CISPR11

CISPR is an abbreviation of French of the International Special Committee on Radio Interference, and it is a standard that sets electromagnetic tolerance for equipment that may be affected by electromagnetic waves. Available to use in hospital and medical institution as ORILEGA is in conformity to CISPR11 and CISPR15.

CE mark compliance / RoHS compliant with environmental directives

Available to import and use in EU as ORILEGA comply with CE mark which required to be labelled on the product complying with the laws and regulations and RoHS directive compliant with the environmental standard in EU. In addition, ORILEGA is designed according to the ENERGY STAR requirements.

Luci Power Supply AC100v-242v

ORILEGA

PC isolated case, safe and durable structure

Robust structure conforming to Japan indoor wiring regulations aimed at securing the safety of electrical equipment Countermeasures against discoloration and overheating

Structure of low heat dissipation

Since the legs are attached, the bottom of the power supply is away from the installation surface, air convects and heat is easy to escape from the power supply.

Maximum distance to the terminal of LED fixture: 35 m

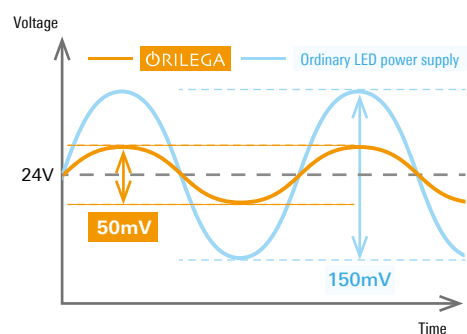

The distance from power supply to the terminal of LED fixture can be extended up to 35 m when the output cable is 1.25 sq mm.

*In case using LED fixture which maximum length per series is 5m.

Low output ripple voltage

Ripple voltage occurs in DC24V output device. It may slightly affect the output effect of the LED fixtures. The lower output ripple voltage, the lower flickering occurs. Output ripple voltage of ORILEGA is 50mV which is lower than other power supply.

LPSOL-145/075/030

Luci ORILEGA 145W/75W/30W 24V

LPSOL	-	24	-	ND	-	I

*Split into multiple circuit

* Please read and follow the specification and the instruction manual issued by the manufacturer of controller and driver. The specification may be subject to change without prior notice.

Wire connection methods

Warning

Do not perform installation/ removal work while power on. Otherwise, an electric shock may occur.

- Make sure the place of installation has enough strength to hold the weight of the device.
 - Make sure the LED fixture meets the specification of this device.
 - Connect ACL wire (black) of the device to Live, ACN wire (white) of the device to Neutral, FG wire (green) of the device to \oplus .
- Caution: Improper connection may cause smoking, fire, electric leakage, ground fault or electric shock.
- Connect the wires of LED fixture to DC black (+) and DC white (-) wires of the device correspondingly.
- Note: For the procedure of connecting LED fixture, please refer to the instruction manual of each product.
- Check the strength of the place to install before screwing.
 - Screws are not attached.
 - Once all installation processes are completed, turn on the power and make sure the LED fixture lights up.

Cautions

- If connect AC main power to the DC output side, the device get damage instantly.
- Please ensure to connect the device to ground in order to protect from electric shock or devices from getting damaged by external noise.

Installing the product

- When installing this product, please make sure to use screws (round head screw M4 x 12mm or longer is recommended) and fix tightly.
- To avoid being shortened lifetime of the device,
 - Do not stack the device on top of each,
 - Do not install the device by turning inside out or by upside down
 - Do not install multiple devices horizontally in parallel on a wall surface.
- Check the strength of the place to install before screwing.
- Screws are not attached.

○ It is possible to set up multiple devices in parallel on the wall if they are in vertical orientation!

⊘ Do not stack the devices!

⊘ Do not install upside down on the ceiling surface!

⊘ Do not install multiple devices in parallel if they are in horizontal orientation!

Maintenance and Inspection

- This product has a life span.
- Degradation occurs inside after 8-10 years of installation even when the device looks fine from the outside.
- Parts of the product degrade due to heat when using for a long period. This causes not only safety issues, but also reduces power efficiency and it is recommended to have regular maintenance and inspection.
- Life cycle of the product will be shorter in high ambient temperature or in the use for a long period.
- Cleaning and inspection should be performed at least once every 6 months.
- Inspection by a specialist, such as a product contractor, should be performed at least once every 3 years.
- If the product is used for a long time without having an inspection, there is a small possibility that it could lead to fuming, igniting, electric shock and the like.

Inspection Methods

- Is the output verification indicator (LED-green: located at the side of the lead-wire on output side) turned on?
- Are output voltage and output current in normal conditions?
- Is there any coloring/ fall-off/ abnormal heat build-up at wiring connection part?
- Is there any unusual smell, sound or heat?
- Are there any cracks, splits, or detached parts on any parts or joints?

Cleaning Method

- Turn off the power before cleaning the device.
- Lightly wipe this product with a soft cloth.
- To best clean this product, wipe dirt with a soft cloth which has been soaked in a neutral detergent diluted with water and wrung firmly. To finish off, wipe it with a damp cloth and dry it.

Dimmer & Power supply

Power supply

Model	Product name	Model No.	Rating	Size	note	
CCC, CE Model	 35W Single Output Switching Power Supply	LRS-35-24	85~264VAC	DC24V 1.5A	W99 H82 D30	- MEAN WELL - I/O terminal block - Protections: Short circuit / Overload / Over voltage
	 100W Single Output Switching Power Supply	LRS-100-24		DC24V 4.5A	W129 H97 D30	
	 150W Single Output Switching Power Supply	LRS-150-24	85~132VAC / 170~264VAC by switch	DC24V 6.5A	W159 H97 D30	- MEAN WELL - I/O terminal block - Protections: Short circuit / Overload / Over voltage / Over temperatur

Specification may be subject to change without announcement.

* Please read and follow the specification and the instruction manual issued by the manufacturer of controller and driver. The specification may be subject to change without prior notice.

Power supply selection method

Pay attention to the electrical capacity of the load (lamp) connected to the power supply. For 15 to 150W, consumption of 70% of a full power or less by the load is typically assumed.

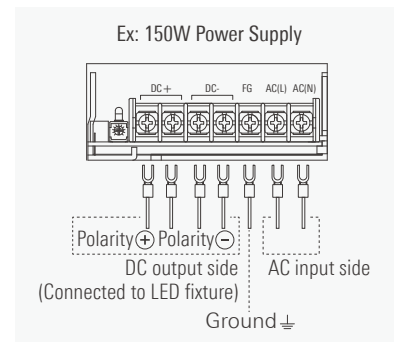

When using dimming driver, the load factor of the LED fixtures connected to the power supply is recommended 60% or less to reduce the possibility of occurrence of noise.

Example: Choosing power supply for 10pcs of Luci Power FLEX 20mm pitch
 Luci Power FLEX 20mm pitch 10.5W x 10pcs = 105W
 $105W \div 70%$ (load factor) = Approx. 150W
 Select a 150W power supply.

Small noise may be emitted from the appliance and the dimmer while using the dimmer, but it is normal. Load capacity of 60% is recommended to reduce noise.

Connecting to power supply

- Cables used for connecting LED fixtures and Power supply must be a suitable type and gauge.
- The cable should be joined with a suitable terminal. Otherwise, the power supply will be broken.
 Please install appropriate environment according to specifications.
 Caution: When using a long thin cable, the resistance of cable will increase. Voltage drop and heat accumulation may occur and result in brightness decreasing.
 Caution: When separate one cable to multiple circuits in the same gauge, the current loading are collected on the junction of the branch circuit and it will be high temperature there. Please consider the loading of the power supply (quantity of LED fixture) and review the wiring system to avoid the above problem.
- When connect the dimmer driver with power supply, unpredicted noise might occur. It is the characteristic of electronic devices, not a malfunction of the LED fixture.
 Please choose an appropriate power supply and consider a place to install. Reducing the loading factor of LED fixture might improve the noise from the power supply, and the noise from LED fixtures might be improved by splitting the circuit of LED fixtures into multiple.

Attention

■ About Lifetime

Our definition of LED lifetime is when 'the brightness becomes 70% of its original brightness' based on the theory which was decided on July 2005 by Japan Luminares Association. Luci calculates the lifetime based on brightness data, current data and so on.

Please understand that this is planned lifetime and it may differ depending on how the products are used.

■ Optical data

Specification may be subject to change without announcement.

The optical data provided on the each product pages are for reference only; the data values are not guaranteed. Please use as reference materials for your planning.

The calculation of "Luminaire efficacy (lm/W)" indicated in this catalog is "Luminaire efficacy (lm/W) = Total luminous flux (measured value) ÷ Power consumption (designed value)".

The "Light source color" indicated in this catalog and specification are the color code of the LED package, not the color temperature of the finished product.

Please contact us for further information of the CCT and CRI tolerance for each products.

■ LED Dimming and noise

When the dimming level is low, the following symptoms may be observed.

- LED doesn't turn on
- LED goes off for the sudden electricity decrease.
- Each LED may turn off at separate times when they are controlled by 1 dimmer.
- When connecting the dimmer driver with power supply, unpredicted noise might occur. It is a characteristic of electronic devices, not a malfunction of the LED fixture. Please choose an appropriate power supply and consider a place to install. Reducing the loading factor of LED fixture might improve the noise from the power supply while the noise for the LED fixtures might be improved by splitting the circuit of LED fixtures into multiple.

■ Effect of sulfur on LED

Please note that color temperature change, color unevenness, and illuminance reduction can occur due to the influence of sulfur even when used indoors. Some foods, chemicals, car exhaust gas contain sulfur ingredients.

■ Maintenance and Inspection

LED fixture has a life span. Degradation occurs inside after 8-10 years of installation even when the fixture looks fine from the outside. Parts of the LED fixture degrade due to heat when the light is on for a long time. This causes not only safety issues, but also reduces power efficiency and it is recommended to have regular maintenance and inspection.

Cleaning and inspection should be performed at least once every 6 months. Inspection by a specialist, such as a product contractor, should be performed at least once every 3 years.

If the LED fixture is used for a long time without having an inspection, there is a small possibility that it could lead to flaming, igniting, electric shock and the like.

Inspection Methods

1. Is LED operating normally?
2. Is there any unusual smell, sound or heat?
3. Are there any cracks, splits, or detached parts on any parts or joints?

Cleaning Methods

1. Lightly wipe the LED fixture with a soft cloth.
2. To best clean the LED fixture, wipe dirt with a soft cloth which has been soaked in a neutral detergent diluted with water and wrung firmly. To finish off, wipe it with a damp cloth and dry it.

■ Operating temperature

Unless otherwise stated in the user's manual or specification sheet, use the product at ambient temperatures between 0-35°C for indoor usage. For outdoor products, refer to the specification sheet and instruction manual since the operating ambient temperature varies depending on the product.

When temperature is higher than the above stated data, the lighting fixture may cause failure or malfunction.

■ Safety of power supply usage

Ensure appropriate installation in accordance with the user's manual of the power supply. Do not use an indoor power supply in outdoors, since it may cause damage, electric shock, smoking, and fires.

When installing in a ceiling, ensure easy access for checkups.

There are also other regulations for power supply installation, and therefore installation work should follow the electric facility construction standards of each country.

■ For safe use of the controller/driver

- Effect on radio

When radio reception is weak, the product may cause noise.

In such cases, keep the product away from the radio, or use an outside antenna.

- Effect on audio/video signal

Audio/video signals such as those from broadcast facilities are weak, and may be affected by electromagnetic waves from the product.

Use shielded wire for audio/video signals, or keep adequate distance from a signal wire to a power wire.

- Effect on medical devices

Effects may occur depending on site environment, type of medical device, and noise-resistant properties of some device. Please do not use where you have concern on this issue.

■ Notes for purchase

For product improvement, the specifications, appearance, and price are subject to change without prior notice.

Consumption tax is not included in the price.

For further detail conditions and terms for purchasing and warranty, please contact Luci sales.

■ Cautions

Please make sure to use correct power supply which match the input voltage written in manual. Otherwise, it may cause damage or fire.

When the product is installed or removed, please make sure the power already turned off.

Do not modify the product. It may cause damage, electrify, or fire.

■ Product Warranty

Warranty period

There shall be a warranty period for the products sold to BUYER by LUCI, which shall be for a period of the following period from the date issued the packing list to BUYER by LUCI.

Three (3) years:

LUCI Power FLEX EX series LFPEX**(pitch)-T****(length)W/S-*(CCT)-CL-I/O

LUCI Power FLEX series LFP15/20-T****(length)W/S-*(CCT)-CL/DF-I/O

LUCI Flat FLEX series LFT10/16-T****(length)W/S-*(CCT)-CL/DF-I/O

LUCI Power FLEX α series LFPA20-0960-*(CCT)-CL-I

LUCI FLEX α series LFX10-T****(length)W/S-*(CCT)-CL/DF-I/O

Two (2) years: Other than the products mentioned in above.

Warranty detail

When there is a product defect during the warranty period despite being installed according to instruction manuals, we replace the product or repair the product. Luci will not bear any cost of construction work related to recalling and replacing.

If the usage time per day exceeds for more than 20 hours, the warranty period is half of the period mentioned above.

■ Disclaimer

In the cases below, the repair or the replacement of our Products are not free of charge.

1. Consumable goods, consumable parts, etc
2. Failure or damage due to misuse, unwarranted repairs or modifications
3. Failure or damage due to dropping, falling over, impacts and mishandling during shipping, storing or after delivery
4. Failure or damage due to fire, salt damage, gas damage (corrosive gas, combustible gas, etc.), organic solvents such as paint liquid, earthquake, storm and flood damage, lightning damage, abnormal voltage or other natural disasters
5. Failure or damage due to unsatisfactory constructions
6. Failure or damage by using an inappropriate power source
7. Failure and damage when using inappropriate power supply and LED driver
8. Failure including luminare, colour hue and colour temperature deterioration or yellowed main body due to aging or dirtiness
9. Failure or damage when the parts where connected to a power source or the connectors of the terminals are not insulated
10. "Failure and damage caused by rats, dogs, cats or other animals or insects"
11. Failure or damage when used in an installed environment or condition which is not advised or prohibited in the instruction manual of each product
12. Failure or damage when lead wire connected parts are not waterproofed properly for outside use
13. Failure or damage when product is altered except for cutting strip light for indoor usage
14. No warranty document
15. Some items in this warranty document are blank or words are rewritten
16. "Compensation for business loss, compensation or the like for indirect costs due to failure or damage of the product"
17. Failure or damage due to lack of maintainance work
18. Failure or damage caused by causes other than those mentioned above which cannot be attributed to Luci.

We shall not cover any indirect operation responsibility and remedy responsibility for the product damage or failure.

Model No. INDEX

	Model No.	Product name	Page	
CAD	CAD-0500-MDFD-I	Power supply cable 500mm for THOF	59
