Dama

Design by Ludovica+Roberto Palomba.

Combining technical quality and refinement with a layer of warmth and intimacy, the Dama collection connects the charm of tradition with the finesse of contemporary lighting design.

“Dama is characterized by the refinement of its proportions combined with the lightness of its lines that give life to a very exquisite silhouette”.

Ludovica+Roberto Palomba

“For the diffuser we decided to dare with an unexpected touch using paper - a noble and tactile material, almost fragile and intangible - which, thanks to its characteristics, gives the lamp a warm light”.

Ludovica+Roberto Palomba

Suspended from a micro-thin cable that's almost invisible to the eye, the pendant version exhibits an ethereal quality, its graceful silhouette looming overhead like a celestial body.

Its timeless yet elevated design transmits a 360 degree glow, offering ambient lighting in all directions.

Dama is a homage to the traditional of luminaires lamp: taking the simplicity of a traditional shade and wire frame, it softens and refines the design in form, material and source of light application. This luminaire is distinguished by an exposed aluminium structure that delimits the edge of its cylindrical shade with honest precision. A distinctive feature rather than a supporting element, the delicacy of the frame provides a feeling of weightlessness and allows the paper diffuser to seemingly float in empty space. Inside the shade, a circular LED lightsource is sealed by a silicon casing to prevent glare. This cutting-edge invisible technology subsequently radiates with a gentle, uniform glow from within. Designed for easy installation, intuitive use and maximum versatility, Dama boasts smart capabilities and dimming control, allowing users to define the perfect ambience.

Knit

Design by Meike Harde.

Light, materiality and tangibility collide with the Knit collection. Its texture is magnetic, calling out for us to touch its surface, to feel its warmth and to keep it close. Light seeps outwards through the fabric and downwards through a translucent screen, softening its luminosity.

While the urchin, a symbol of fertility, conceals a soft inside beneath its protective outer shell, Knit delights in the femininity and softness of its outer layer. It exudes intimacy, comfort and familiarity.

Light seeps outwards through the fabric and downwards through a translucent screen, softening its luminosity.

The Knit collection responds to the tasselled lamps of the past with contemporary craftsmanship and technical innovation.

The Knit collection consists of a series of spheres seemingly flattened, stretched or distorted by intense external pressure. While the urchin, a symbol of fertility, conceals a soft inside beneath its protective outer shell, Knit delights in the femininity and softness of its outer layer. It exudes intimacy, comfort and familiarity. The bulk of each volume is covered in stretchy thread, knitted into ribs using the plating technique. The darker ribs are opaque, tangible, while the space between the ribs is thinly knitted to transmit a diffuse, 360 degree glow. Easy installation and dimming capabilities make Knit the perfect solution for professionals looking for quality indoor lighting with an abundance of charisma.

Floor stemp: Iron steel.
Floor base: Zamak.

A single knitted lycra sleeve stretched over an ovoid polymer diffuser, its texture is magnetic, calling out for us to touch its surface, to feel its warmth and to keep it close.

Spa

Design by Ramos & Bassols.

Spa is the perfect lighting solution for any wellness space. From public dressing rooms, restaurants and spas, to private kitchens, corridors and bathrooms, its graceful simplicity allows for linear lighting and seamless integration within the surrounding architecture of a variety of humid interiors.

VERTICAL WALL

Each luminaire is separated from the wall by a single aluminium support and connects to a simple terminal, invisible from the front, which lends a sense of weightlessness and essentiality to the design.

The diffuser provides a glare-free, front diffuse light, ideal for creating an intimate atmosphere.

Vanity light

Ideal as a bathroom mirror light fixture, Spa can be positioned at an angle to send diffuse, ambience lighting in the desired direction.

SLANTED DIFFUSOR

IP44. Spa can be wiped down with a wet cloth for easy maintenance

The versatility of its system allows the luminaires to be positioned in a row to illuminate up to six metres of wall or ceiling space.

Minimalist and refined in form, Spa is an adaptable system of linear LEDs that allows for limitless compositional freedom to create a broad range of atmospheres, from intimate corners for personal wellbeing to functional spaces designed for general wellness. Particularly apt as a vanity light, it can be positioned at an angle to send diffused light in the desired direction. Due to the subtle fluting effect of the polycarbonate, dense light tapers out from the centre towards the edges of the strip, casting an intense light without glare. The smoothness of its materiality along with the linearity of its grooves contrasts with the matte texture of the aluminium casing, offered in a range of finishings to suit diverse interior aesthetics.

Africa

Design by Francisco Gómez Paz.

An object of desire, Africa is a unique gift that combines richness of form and materiality with high performance lighting capabilities. A holistic exploration of beauty, functionality and the essence of humanity.

“Africa was born as a response to the latest ways of inhabiting, in which the hybridisation of residential and professional spaces is increasingly nomadic, free, and casual”.

Francisco Gómez Paz

Portable

Battery capacity
10.000mAh.

Battery voltage
3,7V.

Battery autonomy:
6,5h at 100% Intensity.
10h at 66% Intensity.
20h at 33% Intensity.

Its chargeable LED light
source provides three
levels of intensity which are
controlled by a simple push
button at the head.

To recharge the luminaire,
the shaft slides seamlessly
into a magnetised charger
a flawless continuation of
its sculptural expression.

Thanks to its high flow lighting, the Africa collection is the perfect companion for detailed task work.

Defined by a slender, conical stem that leads to a neat head, Africa invites you to reach out and grasp it. Available in two sizes, its lacquered matte texture and four natural tones bring warmth and tangibility to the design. Shaped from a single unit of pure aluminium, this mono-materiality lends it a certain weight and technical quality associated with high-end industrial processes. The ancestral, anthropological quality of its discreet silhouette will create a striking statement in any kind of space, public or residential. Its aesthetic versatility is complemented by adaptability: accent a forgotten corner, illuminate a work space, or enjoy a romantic meal with a soft glow.

Mayfair Mini

Design by Diego Fortunato.

The perfect lighting companion.

A light to grab and go, the portable Mayfair Mini is powered by a rechargeable battery and can be moved exactly where needed -indoors or out- via its slender yet sturdy stem.

Intimate light,
dedicated to you.
Perfectly proportioned,
the Mayfair Mini
measures a diminutive
38cm x 20cm and
casts a contained
pool of diffuse,
downward light that
creates an intimate
lighting effect suitable
for quiet moments
of contemplation or
cohabitation.
A small opening
at the top of the
shade also emits a
glow, balancing the
brightness below
by lending a subtle
radiance to the
stem above.

A modern reimagining of the traditional 19th-century bouillotte table lamp, the Mayfair Mini is a statement in small-scale design. Featuring an intriguing play of straight lines and curved contours, its sculptural silhouette exudes an elegant equilibrium.

Fixed luminaries for precise accentuation. Mayfair Mini can be fixed in position to illuminate specific spots, such as the lounge area of a hotel or the communal tables in a library. It comes in a choice of four Chromatica colours that radiate a warm, ambient glow: white, beige, terracotta, and green. Fresh yet familiar, its glossy finishes offer an informal juxtaposition with the fixture's refined form, lending it the versatility to suit a wide range of atmospheres.

The Mayfair Mini is offered in three formats. The portable version is perfect for indoor and outdoor use. Powered by a rechargeable battery, it can be transported to any desired position, while a push button at its base turns it on and off and controls the dimming. It also comes in two bolted versions, available either with a base and push button controls, like the portable, or with no base and available in DALI, 1-10V. The bolted formats are fixed in position, designed to integrate within the surrounding architecture.

Out

Design by Víctor Carrasco.

A romantic response to the global transition to life outside, Out brings the intimacy of indoor lighting outdoors. Suitable for illuminating a table or meeting point, this luminaire emanates with a soft, diffuse downlight, its source obscured by a translucent screen.

Soft, romantic and geometric.
Out is the best option for an
outdoor coworking area.

Indoor & outdoor

Linking interior and exterior spaces has a significant impact on our sense of wellbeing. As we enter an era where outdoor space is becoming increasingly essential, design professionals are turning their attention towards breaking down traditional architectural barriers.

Its slender, egalitarian structure exudes an ethereal magnetism, its cone bringing zenithal lighting al fresco.

● 47 Green L1

4270 Not Fixed

4275 Bolt-down "hard wired"

Whether for meetings, meals or socialising, illuminating an outdoor table from above is difficult to achieve, but Out knows no limits. The ultimate lighting solution for any communal space, it proves that freestanding downlighting is not only possible, but can be beautiful.

An exercise in grace and resilience, it is the high arch of the rod that makes the design so distinctive. Evocative of a flower bending with the weight of its petals in summer, it is designed to bow in response to the wind while fixed by a solid cement base.

A hidden diffuser maintains consistent quality and positioning of the light, even while the cone is moving. Forming islands of light in the darkness, Out will bring poetry to your patio. Coated in a matte finish that grants a certain tenderness, the design is enhanced by six earthy and natural tones.

Break Plus

Design by Xuclà.

Defined by an instinctual connection to the landscape and surrounding architecture, Break Plus converts any wall into a three dimensional mural, casting diffuse, indirect light upwards, downwards or in both directions.

Perfectly blending in any vertical surface in the open air, Break Plus can interact with other wall luminaires casting pathway lighting downwards.

Characterised by its stylized silhouette and available in four muted Chromatica colours, these playful units display an ethereal lighting effect on the wall.

A singular study in technique and high performance, Break Plus is opened at its top and bottom to withstand all weather and to prevent water from stagnating.

Break Plus is evocative of a roof tile or brick, designed individually to connect as a whole. Integrating into the architecture of any space, the collection presents five geometric models that provide spatial depth and aesthetic plasticity to an otherwise flat surface. When grouped together, the collection creates a dynamic dialogue between light and shadow: light is reflected from the interior of each volume, drawing a single or double or beam across the wall, which merge to establish a lattice of oblique lines. Easily installed and with on/ off, Dali and Casambi control systems, systems, its lacquered matte finish adds a hint of graininess that complements its geometric form.

Dots Outdoor

Design by Martín Azúa.

Easily mistaken for a stone during the day, this fixture is designed to nestle into the undergrowth of a garden or amongst the potted plants of a patio. Dots Outdoor shines at night with a low, diffuse or focused glow, the source of which is invisible from almost any angle.

Diminutive, compact and easily integrated into any garden, Dots Outdoor is the perfect solution for a range of exterior low lighting needs. Rather than drawing your eye away from the surrounding vegetation, it becomes a part of it, its soft, natural shades blending effortlessly among plants or gravel. Planted as a single star in the darkness, or combined to create a celestial medley of light, it is as versatile and playful as its indoor counterpart. Each luminaire is carved with a rounded opening that reflects light from an internal source, creating a halo of ambient light like a radiant crown. The other side is closed, allowing the designer to play with the direction of light and ease any intensity.

- 22 Black Anthracite (NCS S 8000-N)
- 25 Beige D1 (NCS S 4005-Y50R)
- 53 Green M1 (NCS S 6005-G80Y)

Class

Design by Sebastian Herkner.

Timeless, elegant and enduring, Class brings the refined, intimate aesthetic of a patio light with the functional performance of a bollard. Rather than silently integrating into the garden environment, it stands handsome and proud, its cylindrical glass luminaire radiating with a soft, diffuse light.

“Class emphasizes its architectural elegance in its vertical metal structure, as well as the soft waves in the borosilicate glass tube. The structured glass spreads the light in a soft patterned way on the facade, the terrace and the greenery around”.

Sebastian Herkner

Class's translucent glass tube is fluted, defined by even grooves that allow the light to pass softly through it while the source remains obscured.

Class's translucent glass tube is fluted, defined by even grooves that allow the light to pass softly through it while the source remains obscured. Each tube is supported by a robust aluminium shaft, available in two different heights and with a choice of individual, multiple or asymmetrical luminaires. The matte black of the shaft contrasts with the smooth surface of the glass tubes, a satisfying combination of textures reminiscent of the traditional gas lamp. Designed to give a little sway with the breeze, the taller free standing shaft bathes a wide area of exterior space in its warm glow. In response, the shorter model projects a soft transition radiance from below.

● 11 Black (NCS S 8500-N)

Body: Aluminium.

Glass: Borosilicate glass.

Diffuser: Opal polycarbonate.

LED 2700 K. CRI >90.

Find your collection at vibia.com
and compose your pendant.

Unlimited by the restraints of traditional electrical systems, a single luminaire can flow freely through space or multiple pendants can be suspended at will, linked to a single point of connection.

Every Vibia single pendant is now offering four electrical connection options (remote, built-in, surface, free wire) promising to bring beauty, harmony and a sense of wellbeing to any interior and type of ceiling.

COMPOSING PENDANTS

The new systems guarantee easy installation, simple maintenance and seamless integration, no matter how unique the architecture.

Compose your pendant at vibia.com and select your preferred electrical connection solution.

Designers can explore a range of connection options using our innovative online compositor tool, which calculates the minimum number of drivers required depending on each composition and provides a customised installation manual according to the design.

Furthermore, Vibia offers support throughout the whole process, from design and composition to installation and use.

Drop ceiling

The innovative remote and built-in fittings accentuate the silkiness and lightness of compositions on suspended ceilings, its great visual grandeur taking center stage.

Remote
